

ADVANCED CANVA DESIGN

FULL VISUAL STUDY MANUAL

Advanced Design System

Move from isolated graphics to a reusable visual system

Brief

Audience, goal and constraints

Grid

Consistent structure

Type

Reusable hierarchy

Colour

Defined functional palette

Components

Repeatable content blocks

QA

Review across formats

Course Code	EDA-ACD-117
Level	Intermediate to Advanced
Duration	6 Weeks (19 Lessons)
Certificate	Professional Certificate in Advanced Canva Design
Prerequisite	Canva Graphic Design
Learning Format	Advanced Practicals + Campaign Design + Professional Handoff

Professional-use standard: create original work or use properly licensed assets; respect privacy, accessibility and brand permissions; do not create misleading endorsements or claims.

Course Introduction

Advanced Canva Design develops the ability to build repeatable visual systems, sophisticated multi-format campaigns and organised professional design workflows. The focus is not on adding more effects; it is on stronger composition, consistent brand rules, reusable templates, information design, motion planning, quality assurance and professional handoff.

Learning Objectives

- Build advanced grid-based compositions.
- Create reusable typography and colour systems.
- Develop brand boards and template families.
- Adapt one campaign concept across multiple formats.
- Create infographics, carousels, presentations and motion assets.
- Apply consistent image art direction.
- Use organised review, versioning and handoff workflows.
- Design with accessibility and responsible asset use.
- Complete a professional multi-format Canva campaign.

Course Structure

1. Lesson 1: Advanced Canva Design: From Graphic to System
2. Lesson 2: Advanced Composition and Grid Systems
3. Lesson 3: Advanced Visual Hierarchy and Focal Control
4. Lesson 4: Advanced Typography and Type Pairing
5. Lesson 5: Advanced Colour Systems
6. Lesson 6: Brand Systems and Brand Boards
7. Lesson 7: Reusable Templates and Component Thinking
8. Lesson 8: Multi-Format Campaign Adaptation
9. Lesson 9: Advanced Image Treatment and Art Direction
10. Lesson 10: Infographics and Information Design
11. Lesson 11: Carousels and Educational Content Design
12. Lesson 12: Presentation Systems and Master-Like Layouts
13. Lesson 13: Advanced Motion and Animated Social Design
14. Lesson 14: Short-Form Video Layouts in Canva
15. Lesson 15: Mockups and Presentation of Design Work
16. Lesson 16: Professional Workflow, Feedback and Version Control
17. Lesson 17: Accessibility and Inclusive Visual Design
18. Lesson 18: Advanced Quality Assurance and Handoff
19. Lesson 19: Final Advanced Canva Campaign Project

Lesson 1: Advanced Canva Design: From Graphic to System

Introduction

Advanced design moves beyond making one attractive graphic. It creates a repeatable visual system that stays clear and recognisable across formats.

Learning Objectives

- Explain advanced principles related to advanced canva design: from graphic to system.
- Complete an advanced guided Canva practical for advanced canva design: from graphic to system.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Start with communication goals and constraints.

Professional principle: Create reusable rules for type, colour, spacing and imagery.

Professional principle: Design systems reduce inconsistency when many assets are produced.

Professional principle: Advanced work requires stronger judgement about hierarchy and restraint.

Professional principle: Professional design includes review, versioning and handoff.

Figure 1: Original instructional visual for Advanced Canva Design: From Graphic to System.

Advanced Guided Practical

1. Choose a fictional Ethan campaign.
2. Write its audience, goal and required outputs.
3. List four visual rules that should remain consistent.
4. Sketch how one message could adapt to three formats.

Ethan Digital Academy Case Study

A course launch may need a flyer, square post, vertical story and presentation cover that look related without being identical.

Review Questions

20. Which advanced principle is most important in advanced canva design: from graphic to system and why?
21. State two professional practices from this lesson.
22. What inconsistency or quality problem could occur if this lesson is ignored?
23. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 1 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 2: Advanced Composition and Grid Systems

Introduction

Grids create invisible structure for complex layouts and make alignment decisions repeatable.

Learning Objectives

- Explain advanced principles related to advanced composition and grid systems.
- Complete an advanced guided Canva practical for advanced composition and grid systems.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Columns divide a page into predictable placement zones.

Professional principle: Margins protect content from edges.

Professional principle: Spacing rhythm creates consistency between groups.

Professional principle: Asymmetrical layouts can still feel balanced when visual weight is controlled.

Professional principle: A focal point should be intentional.

Figure 2: Original instructional visual for Advanced Composition and Grid Systems.

Advanced Guided Practical

1. Create a blank design.
2. Establish equal outer margins.
3. Build a simple two- or three-column structure using guides where available.
4. Place headline, image and details on the grid.
5. Create a second version with controlled asymmetry.

Ethan Digital Academy Case Study

An Academy programme brochure can use a consistent grid across pages while varying image and text placement.

Review Questions

24. Which advanced principle is most important in advanced composition and grid systems and why?
25. State two professional practices from this lesson.
26. What inconsistency or quality problem could occur if this lesson is ignored?
27. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 2 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 3: Advanced Visual Hierarchy and Focal Control

Introduction

Complex designs need deliberate control of first, second and third attention.

Learning Objectives

- Explain advanced principles related to advanced visual hierarchy and focal control.
- Complete an advanced guided Canva practical for advanced visual hierarchy and focal control.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Scale is powerful but should not be the only hierarchy tool.

Professional principle: Contrast, position, whitespace and grouping can guide attention.

Professional principle: Secondary information should support rather than compete with the headline.

Professional principle: Repeated strong accents reduce emphasis.

Professional principle: Test hierarchy at thumbnail size.

Advanced Guided Practical

1. Create a design with six information items.
2. Rank them from 1 to 6 by importance.
3. Use size, contrast and position to express the ranking.
4. Preview at small size.
5. Ask a peer what they notice first.

Ethan Digital Academy Case Study

A professional course advert should make the course name and benefit obvious before dates and contact details.

Review Questions

28. Which advanced principle is most important in advanced visual hierarchy and focal control and why?
29. State two professional practices from this lesson.
30. What inconsistency or quality problem could occur if this lesson is ignored?
31. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 3 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 4: Advanced Typography and Type Pairing

Introduction

Advanced typography creates a consistent voice while protecting readability across many layouts.

Learning Objectives

- Explain advanced principles related to advanced typography and type pairing.
- Complete an advanced guided Canva practical for advanced typography and type pairing.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Define roles such as display, heading, body and microcopy.

Professional principle: Pair typefaces by contrast and compatibility rather than novelty.

Professional principle: Control line length, spacing and alignment for reading comfort.

Professional principle: Use emphasis consistently.

Professional principle: Avoid decorative treatments that reduce clarity.

Figure 4: Original instructional visual for Advanced Typography and Type Pairing.

Advanced Guided Practical

1. Select a display and body typeface available in Canva.
2. Create four named text styles.
3. Build a headline with a two-line lockup.
4. Create a dense information block and improve its readability.
5. Document the type rules.

Ethan Digital Academy Case Study

Ethan Digital Academy can use the same typography roles across social graphics, manuals and presentations.

Review Questions

32. Which advanced principle is most important in advanced typography and type pairing and why?
33. State two professional practices from this lesson.
34. What inconsistency or quality problem could occur if this lesson is ignored?
35. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 4 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 5: Advanced Colour Systems

Introduction

A professional palette assigns functional roles to colours and tests them across backgrounds and outputs.

Learning Objectives

- Explain advanced principles related to advanced colour systems.
- Complete an advanced guided Canva practical for advanced colour systems.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Primary colour carries core identity.

Professional principle: Secondary colours extend the system without overpowering it.

Professional principle: Accent colour should be reserved for selective emphasis.

Professional principle: Neutral colours support backgrounds, borders and readable text.

Professional principle: Contrast must remain sufficient for important text and controls.

Figure 5: Original instructional visual for Advanced Colour Systems.

Advanced Guided Practical

1. Build a palette with primary, secondary, accent and neutrals.
2. Create light and dark applications.
3. Test headline and body contrast.
4. Create a CTA treatment.
5. Record when each colour should be used.

Ethan Digital Academy Case Study

A restrained Academy palette can create recognition while still allowing different campaigns to have controlled variation.

Review Questions

36. Which advanced principle is most important in advanced colour systems and why?
37. State two professional practices from this lesson.
38. What inconsistency or quality problem could occur if this lesson is ignored?
39. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 5 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 6: Brand Systems and Brand Boards

Introduction

A brand board turns visual choices into reusable guidance.

Learning Objectives

- Explain advanced principles related to brand systems and brand boards.
- Complete an advanced guided Canva practical for brand systems and brand boards.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Logo rules cover approved versions, size and clear space.

Professional principle: Typography rules define roles, not just font names.

Professional principle: Colour rules define consistent values and functions.

Professional principle: Imagery rules can specify crop, tone, subject and treatment.

Professional principle: Examples help future designers apply the system.

Figure 6: Original instructional visual for Brand Systems and Brand Boards.

Advanced Guided Practical

1. Create a one-page advanced brand board.
2. Add logo usage notes.
3. Add type hierarchy.
4. Add palette roles.
5. Add two image-treatment examples.
6. Add one do/don't example.

Ethan Digital Academy Case Study

A shared Academy brand board helps course, marketing and administrative materials feel like one organisation.

Review Questions

40. Which advanced principle is most important in brand systems and brand boards and why?
41. State two professional practices from this lesson.
42. What inconsistency or quality problem could occur if this lesson is ignored?
43. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 6 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 7: Reusable Templates and Component Thinking

Introduction

Reusable templates separate stable brand structure from content that changes.

Learning Objectives

- Explain advanced principles related to reusable templates and component thinking.
- Complete an advanced guided Canva practical for reusable templates and component thinking.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Master templates should preserve key brand decisions.

Professional principle: Editable zones should be obvious to future users.

Professional principle: Repeated components can include headers, labels, CTA blocks and feature cards.

Professional principle: Variants should be purpose-built rather than stretched carelessly.

Professional principle: Template instructions reduce accidental inconsistency.

Figure 7: Original instructional visual for Reusable Templates and Component Thinking.

Advanced Guided Practical

1. Create a master social post.
2. Identify stable and editable zones.
3. Build two variants using the same system.
4. Create a reusable CTA component.
5. Add a short usage note.

Ethan Digital Academy Case Study

Academy staff can update course titles and dates without redesigning the entire visual structure.

Review Questions

44. Which advanced principle is most important in reusable templates and component thinking and why?
45. State two professional practices from this lesson.
46. What inconsistency or quality problem could occur if this lesson is ignored?
47. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 7 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 8: Multi-Format Campaign Adaptation

Introduction

Advanced designers adapt a concept rather than simply resizing it.

Learning Objectives

- Explain advanced principles related to multi-format campaign adaptation.
- Complete an advanced guided Canva practical for multi-format campaign adaptation.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Each placement has different proportions and viewing behaviour.

Professional principle: Keep the core message and identity consistent.

Professional principle: Recompose content for square, vertical and wide layouts.

Professional principle: Remove lower-priority information when space is limited.

Professional principle: Check readability on the target device.

Figure 8: Original instructional visual for Multi-Format Campaign Adaptation.

Advanced Guided Practical

1. Create a core campaign visual.
2. Adapt it to square.
3. Adapt it to 9:16 vertical.
4. Adapt it to a wide banner.
5. Compare what changed and what remained consistent.

Ethan Digital Academy Case Study

An Ethan course campaign can preserve headline, colours and image treatment while changing composition for each channel.

Review Questions

48. Which advanced principle is most important in multi-format campaign adaptation and why?
49. State two professional practices from this lesson.
50. What inconsistency or quality problem could occur if this lesson is ignored?
51. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 8 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 9: Advanced Image Treatment and Art Direction

Introduction

Art direction gives a collection of images a consistent visual character.

Learning Objectives

- Explain advanced principles related to advanced image treatment and art direction.
- Complete an advanced guided Canva practical for advanced image treatment and art direction.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Choose images that support the campaign message.

Professional principle: Use consistent crop logic and focal placement.

Professional principle: Overlays can improve text readability when used carefully.

Professional principle: Frames and masks can create a repeated visual language.

Professional principle: Do not over-edit images until subjects become misleading.

Figure 9: Original instructional visual for Advanced Image Treatment and Art Direction.

Advanced Guided Practical

1. Select three authorised images.
2. Apply a consistent crop rule.
3. Create one overlay treatment.
4. Create one frame treatment.
5. Compare the set for consistency.

Ethan Digital Academy Case Study

Academy campaign photography can feel unified even when taken at different times if crop and treatment rules are consistent.

Review Questions

52. Which advanced principle is most important in advanced image treatment and art direction and why?
53. State two professional practices from this lesson.
54. What inconsistency or quality problem could occur if this lesson is ignored?
55. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 9 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 10: Infographics and Information Design

Introduction

Information design converts facts, processes or comparisons into an understandable visual structure.

Learning Objectives

- Explain advanced principles related to infographics and information design.
- Complete an advanced guided Canva practical for infographics and information design.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Begin with the question the viewer needs answered.

Professional principle: Use accurate, relevant data.

Professional principle: Charts and icons should clarify rather than decorate.

Professional principle: Labels should be close to the information they explain.

Professional principle: Avoid visual effects that exaggerate differences.

Figure 10: Original instructional visual for Infographics and Information Design.

Advanced Guided Practical

1. Choose a harmless set of fictional course statistics.
2. Write the main insight.
3. Choose an appropriate chart or comparison structure.
4. Add clear labels.
5. Remove any decorative element that does not aid understanding.

Ethan Digital Academy Case Study

An Academy infographic can explain a learning pathway or programme structure without overwhelming the viewer.

Review Questions

56. Which advanced principle is most important in infographics and information design and why?
57. State two professional practices from this lesson.
58. What inconsistency or quality problem could occur if this lesson is ignored?
59. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 10 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 11: Carousels and Educational Content Design

Introduction

Multi-page social carousels need a clear narrative and consistent page system.

Learning Objectives

- Explain advanced principles related to carousels and educational content design.
- Complete an advanced guided Canva practical for carousels and educational content design.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: The cover should create a clear reason to continue.

Professional principle: Each page should communicate one main point.

Professional principle: Navigation cues and repeated structure improve flow.

Professional principle: Final pages can summarise or provide a useful action.

Professional principle: Consistency should not make every page visually identical.

Advanced Guided Practical

1. Plan a five-page educational carousel.
2. Write one purpose per page.
3. Design the cover and page system.
4. Create a final summary/CTA page.
5. Review the sequence without reading your planning notes.

Ethan Digital Academy Case Study

Ethan Digital Academy can teach a short concept through a carousel while directing interested learners to the full course.

Review Questions

60. Which advanced principle is most important in carousels and educational content design and why?
61. State two professional practices from this lesson.
62. What inconsistency or quality problem could occur if this lesson is ignored?
63. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 11 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 12: Presentation Systems and Master-Like Layouts

Introduction

Advanced presentation design uses repeatable slide families rather than one-off decoration.

Learning Objectives

- Explain advanced principles related to presentation systems and master-like layouts.
- Complete an advanced guided Canva practical for presentation systems and master-like layouts.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Create title, section, content, image and closing slide patterns.

Professional principle: Keep title placement and spacing predictable.

Professional principle: Use visual evidence instead of excessive paragraphs.

Professional principle: Charts and diagrams should be readable at presentation distance.

Professional principle: Motion should support sequence.

Advanced Guided Practical

1. Create five slide-layout families.
2. Build a seven-slide mini deck using them.
3. Check consistency of titles and margins.
4. Replace one text-heavy slide with a visual explanation.
5. Present the deck in sequence.

Ethan Digital Academy Case Study

Academy instructors can create recognisable teaching decks while adapting layouts to different lesson needs.

Review Questions

64. Which advanced principle is most important in presentation systems and master-like layouts and why?
65. State two professional practices from this lesson.
66. What inconsistency or quality problem could occur if this lesson is ignored?
67. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 12 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 13: Advanced Motion and Animated Social Design

Introduction

Motion can control attention, sequence and energy when timing is deliberate.

Learning Objectives

- Explain advanced principles related to advanced motion and animated social design.
- Complete an advanced guided Canva practical for advanced motion and animated social design.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Animate the message, not every object.

Professional principle: Entry order can reinforce hierarchy.

Professional principle: Reading time matters more than visual novelty.

Professional principle: Looping motion should not become distracting.

Professional principle: Preview the full piece before export.

Figure 13: Original instructional visual for Advanced Motion and Animated Social Design.

Advanced Guided Practical

1. Create a three-scene announcement.
2. Plan entry order on paper.
3. Apply restrained animation.
4. Adjust timing for comfortable reading.
5. Export or preview according to the exercise.

Ethan Digital Academy Case Study

A short Academy announcement can reveal headline, benefit and CTA in sequence without distracting effects.

Review Questions

68. Which advanced principle is most important in advanced motion and animated social design and why?
69. State two professional practices from this lesson.
70. What inconsistency or quality problem could occur if this lesson is ignored?
71. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 13 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 14: Short-Form Video Layouts in Canva

Introduction

Canva can support simple branded short-form video layouts using text, clips, audio and motion.

Learning Objectives

- Explain advanced principles related to short-form video layouts in canva.
- Complete an advanced guided Canva practical for short-form video layouts in canva.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Plan a beginning, middle and end.

Professional principle: Keep text within safe readable areas.

Professional principle: Use captions or on-screen text when appropriate.

Professional principle: Audio must be authorised and should not overpower speech.

Professional principle: Brand elements should remain visible without dominating the content.

Advanced Guided Practical

1. Storyboard a 15-second educational clip.
2. Create three scenes.
3. Add concise on-screen text.
4. Add an authorised audio track only if available.
5. Preview on a phone-sized view.

Ethan Digital Academy Case Study

An Academy short video can introduce a course in three scenes: problem, learning benefit and registration action.

Review Questions

72. Which advanced principle is most important in short-form video layouts in canva and why?
73. State two professional practices from this lesson.
74. What inconsistency or quality problem could occur if this lesson is ignored?
75. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 14 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 15: Mockups and Presentation of Design Work

Introduction

Mockups help audiences imagine a design in context, but should not misrepresent a finished product.

Learning Objectives

- Explain advanced principles related to mockups and presentation of design work.
- Complete an advanced guided Canva practical for mockups and presentation of design work.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Use mockups to demonstrate context such as screen, poster or stationery.

Professional principle: Keep the design itself legible enough to evaluate.

Professional principle: Label conceptual mockups when necessary.

Professional principle: Do not imply partnerships, endorsements or real-world placements that do not exist.

Professional principle: Present flat artwork alongside mockups for accurate review.

Advanced Guided Practical

1. Place a practice design into an available mockup.
2. Create a flat-artwork comparison page.
3. Add a clear 'concept' label if needed.
4. Check that the mockup does not hide important details.

Ethan Digital Academy Case Study

Academy design proposals can show a concept on a phone screen while still providing the original flat graphic for approval.

Review Questions

76. Which advanced principle is most important in mockups and presentation of design work and why?
77. State two professional practices from this lesson.
78. What inconsistency or quality problem could occur if this lesson is ignored?
79. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 15 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 16: Professional Workflow, Feedback and Version Control

Introduction

Advanced design work needs a clear process for drafts, feedback, approval and file organisation.

Learning Objectives

- Explain advanced principles related to professional workflow, feedback and version control.
- Complete an advanced guided Canva practical for professional workflow, feedback and version control.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Name drafts and approved exports clearly.

Professional principle: Collect feedback against the brief, not personal taste alone.

Professional principle: Consolidate conflicting comments before revision.

Professional principle: Keep an approved master separate from experimental versions.

Professional principle: Archive source files and final exports.

Figure 16: Original instructional visual for Professional Workflow, Feedback and Version Control.

Advanced Guided Practical

1. Create Drafts, Review and Approved folders.
2. Save a fictional v1 and v2 design.
3. Write three focused review questions.
4. Create a revision log.
5. Move only the approved export to the Approved folder.

Ethan Digital Academy Case Study

An Academy marketing team can avoid publishing an old flyer by separating drafts from approved campaign assets.

Review Questions

80. Which advanced principle is most important in professional workflow, feedback and version control and why?
81. State two professional practices from this lesson.
82. What inconsistency or quality problem could occur if this lesson is ignored?
83. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 16 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 17: Accessibility and Inclusive Visual Design

Introduction

Inclusive design improves access for people with different visual, cognitive and device needs.

Learning Objectives

- Explain advanced principles related to accessibility and inclusive visual design.
- Complete an advanced guided Canva practical for accessibility and inclusive visual design.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Use readable text sizes and sufficient contrast.

Professional principle: Do not rely on colour alone for essential meaning.

Professional principle: Keep layouts predictable and uncluttered.

Professional principle: Use captions or text alternatives where the publishing platform supports them.

Professional principle: Plain language can improve comprehension.

Advanced Guided Practical

1. Audit an existing practice design.
2. Check contrast and text size.
3. Identify information communicated only by colour.
4. Rewrite one unclear text block.
5. Create a more accessible revision.

Ethan Digital Academy Case Study

Academy materials should remain understandable on common phones and for learners with different accessibility needs.

Review Questions

84. Which advanced principle is most important in accessibility and inclusive visual design and why?
85. State two professional practices from this lesson.
86. What inconsistency or quality problem could occur if this lesson is ignored?
87. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 17 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 18: Advanced Quality Assurance and Handoff

Introduction

Before delivery, advanced designers verify content, technical output and the completeness of the handoff.

Learning Objectives

- Explain advanced principles related to advanced quality assurance and handoff.
- Complete an advanced guided Canva practical for advanced quality assurance and handoff.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Check spelling, names, dates, prices and contact details.

Professional principle: Confirm brand rules and asset rights.

Professional principle: Inspect every output at its real size.

Professional principle: Provide source/editable files only to authorised recipients.

Professional principle: Package final exports with clear names and instructions.

Advanced Guided Practical

1. Create a preflight checklist.
2. Review three campaign outputs.
3. Correct at least three issues.
4. Create an organised handoff folder.
5. Write a short handoff note.

Ethan Digital Academy Case Study

A course campaign should not be published until every format has passed the same content and brand review.

Review Questions

88. Which advanced principle is most important in advanced quality assurance and handoff and why?
89. State two professional practices from this lesson.
90. What inconsistency or quality problem could occur if this lesson is ignored?
91. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 18 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Lesson 19: Final Advanced Canva Campaign Project

Introduction

The capstone combines brand systems, multi-format adaptation, information design, motion and professional handoff.

Learning Objectives

- Explain advanced principles related to final advanced canva campaign project.
- Complete an advanced guided Canva practical for final advanced canva campaign project.
- Apply the technique to a professional Ethan Digital Academy design scenario.

Teaching Content

Professional principle: Develop a complete campaign from one approved brief.

Professional principle: Create a documented mini design system.

Professional principle: Produce coordinated static and motion outputs.

Professional principle: Demonstrate responsible asset use and accessibility.

Professional principle: Submit a rationale, review checklist and organised handoff.

Figure 19: Original instructional visual for Final Advanced Canva Campaign Project.

Advanced Guided Practical

1. Write the campaign brief.
2. Create the brand/system board.
3. Design the hero visual.
4. Create square and vertical adaptations.
5. Create an infographic or educational carousel.
6. Create one short motion/video asset.
7. Run quality assurance.
8. Package final exports and rationale.

Ethan Digital Academy Case Study

The final project demonstrates professional Canva design as a repeatable system rather than a collection of unrelated graphics.

Review Questions

92. Which advanced principle is most important in final advanced canva campaign project and why?
93. State two professional practices from this lesson.
94. What inconsistency or quality problem could occur if this lesson is ignored?
95. How would you apply this lesson across multiple Academy campaign assets?

Assignment

Complete the Lesson 19 advanced practical using original or authorised assets. Submit the design, a short rationale, and one before/after comparison showing how your professional design decisions improved the work.

Final Advanced Canva Campaign Project - 100 Marks

Component	Marks	Requirement
Campaign brief	10	Audience, objective, message, constraints and outputs.
Design system	15	Brand board, grid, typography, colour and image rules.
Hero visual	15	Strong focal control and professional composition.
Multi-format adaptations	15	Square, vertical and wide formats recomposed effectively.
Information design	10	Infographic or educational carousel is clear and accurate.
Motion/video asset	10	Purposeful sequence, timing and brand consistency.
Accessibility & responsible assets	10	Readable, inclusive and properly authorised content.
QA & handoff	5	Preflight completed and files organised.
Rationale	10	Explains decisions, revisions and system consistency.

Course Quiz - 30 Questions

1. What distinguishes a design system from a single graphic?
2. What is a grid?
3. Why are margins important?
4. What is spacing rhythm?
5. What is focal control?
6. Name four typography roles.
7. Why should type pairing be deliberate?
8. What is a functional colour palette?
9. What is the purpose of a neutral colour?
10. Name four parts of a brand system.
11. What is a reusable design component?
12. What is an editable zone in a template?
13. Why should a campaign be recomposed rather than simply resized?
14. What should remain consistent across campaign formats?
15. What is art direction?
16. Name two ways to make different images feel related.
17. What is information design?
18. Why must infographic data be accurate?
19. What is the purpose of a carousel cover?
20. Why should each carousel page have one main point?
21. Name three presentation layout families.
22. Why should presentation slides avoid excessive text?
23. What is motion hierarchy?
24. Why does reading time matter in animation?
25. What should a short-form video storyboard contain?
26. Why should conceptual mockups be labelled when necessary?
27. What is version control in a design workflow?

28. Name two inclusive visual-design practices.
29. What belongs in a design preflight check?
30. List six deliverables or stages in the final advanced Canva project.

Final Examination - 100 Marks

Section A - Advanced Composition (20 marks)

Explain grids, hierarchy, typography and functional colour systems with applied examples.

Section B - Brand and Template Systems (20 marks)

Design a reusable brand and template architecture for an Ethan Digital Academy campaign.

Section C - Multi-Format and Information Design (20 marks)

Explain campaign adaptation, image art direction, infographics and educational carousels.

Section D - Presentation and Motion (20 marks)

Plan a presentation system and a short motion/video asset with purposeful sequence and timing.

Section E - Professional Workflow (20 marks)

Explain accessibility, feedback, version control, quality assurance and organised handoff.

Course Completion Outcome

After successful completion, the learner should be able to create sophisticated Canva-based visual systems and campaigns, maintain brand consistency across formats, design reusable templates and components, communicate information visually, plan restrained motion, manage feedback and versions, review accessibility and asset rights, and deliver organised professional design packages.

Professional Practice Checklist

- Design from a brief, not from decoration.
- Use grids and spacing systems consistently.
- Define typography and colour roles.
- Recompose campaigns for each format.
- Use accurate data and authorised assets.
- Label conceptual mockups appropriately.
- Keep drafts separate from approved exports.
- Run accessibility and content checks before publication.
- Deliver organised source files, exports and rationale.
