

CORELDRAW ESSENTIALS

FULL VISUAL STUDY MANUAL

Vector Design Workflow

Build artwork from editable objects and curves

Brief

Define purpose and output

Shapes

Construct clean objects

Type

Create readable hierarchy

Colour

Apply controlled
fills/outlines

Review

Check alignment and scale

Export

Choose print/web format

Course Code	EDA-CDR-119
Level	Beginner to Intermediate
Duration	6 Weeks (19 Lessons)
Certificate	Professional Certificate in CorelDRAW Essentials
Prerequisite	Digital Literacy / Graphic Design Fundamentals recommended
Learning Format	Guided Vector Practicals + Print/Digital Promotional Project

Responsible design standard: create original vector work or use properly licensed assets. Do not copy protected logos, trace copyrighted commercial artwork, fabricate endorsements or publish private information.

Course Introduction

CorelDRAW Essentials teaches practical vector-graphics production for logos, icons, flyers, posters and digital graphics. Learners progress from the workspace and basic shapes to node editing, typography, colour, precision layout, object shaping, image placement, print preparation and final export.

Learning Objectives

- Understand vector and raster graphics.
- Navigate the CorelDRAW workspace.
- Create and transform vector shapes.
- Edit nodes and curves.
- Apply fills, outlines and typography.
- Align, distribute, group and organise objects.
- Combine geometry into original forms.
- Prepare basic print and digital outputs.
- Complete a coordinated vector promotional package.

Course Structure

1. Lesson 1: Introduction to CorelDRAW and Vector Graphics
2. Lesson 2: Understanding the CorelDRAW Workspace
3. Lesson 3: Vector and Raster Graphics
4. Lesson 4: Document Setup, Page Size and Units
5. Lesson 5: Drawing Basic Shapes
6. Lesson 6: Selecting, Moving, Scaling and Rotating Objects
7. Lesson 7: Node Editing and Curves
8. Lesson 8: Fills, Outlines and Colour
9. Lesson 9: Working with Text
10. Lesson 10: Alignment, Distribution, Guides and Snapping
11. Lesson 11: Object Order, Grouping and Organisation
12. Lesson 12: Combining and Shaping Objects
13. Lesson 13: Transparency, Gradients and Simple Effects
14. Lesson 14: Importing Images and Working with Bitmaps
15. Lesson 15: Simple Logo and Icon Design
16. Lesson 16: Flyer and Poster Layout
17. Lesson 17: Print Preparation Basics
18. Lesson 18: Export for Digital Use
19. Lesson 19: Final CorelDRAW Promotional Package

Lesson 1: Introduction to CorelDRAW and Vector Graphics

Introduction

CorelDRAW is a vector-graphics application used for logos, signs, layouts, illustrations and print-oriented graphics. This course focuses on original, practical vector design.

Learning Objectives

- Explain the main principles of introduction to coreldraw and vector graphics.
- Complete a guided CorelDRAW practical for introduction to coreldraw and vector graphics.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Vector artwork is built from paths, shapes and curves.

Key principle: Vector objects can be scaled without the pixelation typical of raster enlargement.

Key principle: A design should begin with purpose, audience and output requirements.

Key principle: Objects remain editable when the master file is preserved.

Key principle: Responsible design requires original or properly licensed assets.

Figure 1: Original instructional visual for Introduction to CorelDRAW and Vector Graphics.

Step-by-Step Guided Practical

1. Open CorelDRAW or an instructor-approved training installation.
2. Create a blank practice document.
3. Draw one rectangle and one ellipse.
4. Save the editable file with a meaningful name.

Ethan Digital Academy Case Study

Ethan Digital Academy can use vector graphics for scalable logos, signage and course promotional layouts.

Review Questions

20. What is the main purpose of introduction to coreldraw and vector graphics?
21. State two professional vector-design practices from this lesson.
22. What common quality or copyright mistake should be avoided?
23. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 1 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 2: Understanding the CorelDRAW Workspace

Introduction

The workspace combines a page, toolbox, property controls, colour tools and object-management panels.

Learning Objectives

- Explain the main principles of understanding the coreldraw workspace.
- Complete a guided CorelDRAW practical for understanding the coreldraw workspace.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: The page represents the design/output area.

Key principle: The toolbox provides selection, shape, drawing and text tools.

Key principle: The property bar changes according to the active tool or object.

Key principle: Panels or dockers provide detailed object controls.

Key principle: Zoom and pan help inspect artwork without changing it.

Figure 2: Original instructional visual for Understanding the CorelDRAW Workspace.

Step-by-Step Guided Practical

1. Identify the page, toolbox and property controls.
2. Select two different tools and observe changing options.
3. Zoom in and out.
4. Return to a comfortable page view.

Ethan Digital Academy Case Study

Workspace confidence reduces accidental editing and makes practical work faster.

Review Questions

24. What is the main purpose of understanding the coreldraw workspace?
25. State two professional vector-design practices from this lesson.
26. What common quality or copyright mistake should be avoided?
27. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 2 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 3: Vector and Raster Graphics

Introduction

Understanding vector and raster graphics helps learners choose suitable tools and output formats.

Learning Objectives

- Explain the main principles of vector and raster graphics.
- Complete a guided CorelDRAW practical for vector and raster graphics.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Vectors use mathematical paths and curves.

Key principle: Raster images use pixels.

Key principle: Logos and icons often benefit from vector construction.

Key principle: Photographs are normally raster images.

Key principle: CorelDRAW can place raster images inside vector layouts, but they do not become true vectors automatically.

Figure 3: Original instructional visual for Vector and Raster Graphics.

Step-by-Step Guided Practical

1. Create a vector circle.
2. Import an authorised small raster image.
3. Zoom in closely on both.
4. Compare edge behaviour.
5. Write one suitable use for each image type.

Ethan Digital Academy Case Study

An Academy logo should remain crisp on a business card and a large banner, making vector construction useful.

Review Questions

28. What is the main purpose of vector and raster graphics?
29. State two professional vector-design practices from this lesson.
30. What common quality or copyright mistake should be avoided?
31. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 3 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 4: Document Setup, Page Size and Units

Introduction

Correct document setup reduces resizing and output errors later.

Learning Objectives

- Explain the main principles of document setup, page size and units.
- Complete a guided CorelDRAW practical for document setup, page size and units.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Choose page dimensions for the intended product.

Key principle: Units may include millimetres, inches or pixels depending on work.

Key principle: Orientation should match the design purpose.

Key principle: Margins and safe areas protect important content.

Key principle: Print providers may require bleed or other specifications.

Step-by-Step Guided Practical

1. Create an A4 practice document.
2. Change orientation and observe the page.
3. Set a consistent unit.
4. Create simple margin guides.
5. Save the setup as a practice file.

Ethan Digital Academy Case Study

A course flyer should be created at the intended size rather than stretched at the final printing stage.

Review Questions

32. What is the main purpose of document setup, page size and units?
33. State two professional vector-design practices from this lesson.
34. What common quality or copyright mistake should be avoided?
35. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 4 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 5: Drawing Basic Shapes

Introduction

Rectangles, ellipses, polygons and other basic shapes are building blocks for vector design.

Learning Objectives

- Explain the main principles of drawing basic shapes.
- Complete a guided CorelDRAW practical for drawing basic shapes.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Simple shapes can create panels, badges and symbols.

Key principle: Dimensions can be controlled numerically where needed.

Key principle: Corner properties can change a rectangle appearance.

Key principle: Duplicate repeated shapes for consistency.

Key principle: Avoid unnecessary decorative shapes.

Figure 5: Original instructional visual for Drawing Basic Shapes.

Step-by-Step Guided Practical

1. Draw a rectangle, ellipse and polygon.
2. Resize each deliberately.
3. Duplicate one shape.
4. Create a simple badge from two shapes.
5. Align the badge components.

Ethan Digital Academy Case Study

Academy course category icons can begin with consistent geometric construction.

Review Questions

36. What is the main purpose of drawing basic shapes?
37. State two professional vector-design practices from this lesson.
38. What common quality or copyright mistake should be avoided?
39. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 5 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 6: Selecting, Moving, Scaling and Rotating Objects

Introduction

Object transformation is central to arranging a vector composition.

Learning Objectives

- Explain the main principles of selecting, moving, scaling and rotating objects.
- Complete a guided CorelDRAW practical for selecting, moving, scaling and rotating objects.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Selection identifies the object to edit.

Key principle: Dragging can reposition objects.

Key principle: Handles can scale or rotate depending on the tool state.

Key principle: Proportional scaling helps preserve shape.

Key principle: Copies should be used when the original must remain.

Step-by-Step Guided Practical

1. Create three shapes.
2. Move them into a simple composition.
3. Scale one proportionally.
4. Rotate a duplicate.
5. Undo and redo one transformation.

Ethan Digital Academy Case Study

A promotional layout can reuse a repeated motif at different sizes without redrawing it.

Review Questions

40. What is the main purpose of selecting, moving, scaling and rotating objects?
41. State two professional vector-design practices from this lesson.
42. What common quality or copyright mistake should be avoided?
43. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 6 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 7: Node Editing and Curves

Introduction

Node editing allows custom vector forms beyond basic geometry.

Learning Objectives

- Explain the main principles of node editing and curves.
- Complete a guided CorelDRAW practical for node editing and curves.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Nodes anchor a path.

Key principle: Segments connect nodes.

Key principle: Handles influence curve direction and shape.

Key principle: Too many nodes can make curves harder to control.

Key principle: Smooth curves should be built with deliberate node placement.

Figure 7: Original instructional visual for Node Editing and Curves.

Step-by-Step Guided Practical

1. Draw or create a simple curve.
2. Activate the shape/node tool.
3. Move one node.
4. Adjust a curve handle.
5. Simplify the shape if unnecessary nodes exist.

Ethan Digital Academy Case Study

An original Academy icon can be refined from simple curves without copying another organisation's mark.

Review Questions

44. What is the main purpose of node editing and curves?
45. State two professional vector-design practices from this lesson.
46. What common quality or copyright mistake should be avoided?
47. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 7 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 8: Fills, Outlines and Colour

Introduction

Vector objects have interior fills and outlines that can be controlled independently.

Learning Objectives

- Explain the main principles of fills, outlines and colour.
- Complete a guided CorelDRAW practical for fills, outlines and colour.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Fill is the interior appearance of an object.

Key principle: Outline is the object border or stroke.

Key principle: Consistent palettes support brand recognition.

Key principle: Outline thickness should suit output size.

Key principle: Contrast affects readability and separation.

Figure 8: Original instructional visual for Fills, Outlines and Colour.

Step-by-Step Guided Practical

1. Apply a solid fill to three shapes.
2. Change one outline width.
3. Remove an outline from one object.
4. Create a three-colour practice palette.
5. Check contrast on light and dark backgrounds.

Ethan Digital Academy Case Study

Ethan graphics can use a restrained palette and consistent outline treatment across related materials.

Review Questions

48. What is the main purpose of fills, outlines and colour?
49. State two professional vector-design practices from this lesson.
50. What common quality or copyright mistake should be avoided?
51. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 8 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 9: Working with Text

Introduction

CorelDRAW supports text for headlines, labels and longer layout content.

Learning Objectives

- Explain the main principles of working with text.
- Complete a guided CorelDRAW practical for working with text.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Display/artistic text is useful for short headlines.

Key principle: Paragraph text is useful for larger blocks where available.

Key principle: Typography needs hierarchy and readable spacing.

Key principle: Alignment should connect text to other elements.

Key principle: Use fonts that are licensed or authorised for the intended work.

Figure 9: Original instructional visual for Working with Text.

Step-by-Step Guided Practical

1. Create a headline.
2. Create a supporting text block.
3. Apply two levels of hierarchy.
4. Align text to a shape or guide.
5. Check readability at normal size.

Ethan Digital Academy Case Study

A course flyer can use a strong headline with smaller schedule and registration information.

Review Questions

52. What is the main purpose of working with text?
53. State two professional vector-design practices from this lesson.
54. What common quality or copyright mistake should be avoided?
55. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 9 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 10: Alignment, Distribution, Guides and Snapping

Introduction

Precision tools create professional spacing and object relationships.

Learning Objectives

- Explain the main principles of alignment, distribution, guides and snapping.
- Complete a guided CorelDRAW practical for alignment, distribution, guides and snapping.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Alignment places objects on common edges or centres.

Key principle: Distribution creates equal spacing.

Key principle: Guides provide visual placement references.

Key principle: Snapping can assist precise positioning.

Key principle: Measured relationships are more reliable than visual guessing alone.

Figure 10: Original instructional visual for Alignment, Distribution, Guides and Snapping.

Step-by-Step Guided Practical

1. Create four equal shapes.
2. Align their top edges.
3. Distribute them evenly.
4. Add a guide.
5. Move a headline into alignment with the guide.

Ethan Digital Academy Case Study

Course-feature cards look more professional when their spacing is consistent.

Review Questions

56. What is the main purpose of alignment, distribution, guides and snapping?
57. State two professional vector-design practices from this lesson.
58. What common quality or copyright mistake should be avoided?
59. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 10 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 11: Object Order, Grouping and Organisation

Introduction

Complex designs become easier to edit when objects are named, grouped and stacked deliberately.

Learning Objectives

- Explain the main principles of object order, grouping and organisation.
- Complete a guided CorelDRAW practical for object order, grouping and organisation.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Front/back order controls overlap.

Key principle: Grouping lets related objects move together.

Key principle: Ungrouping restores individual editing.

Key principle: Object managers/panels can help locate hidden content.

Key principle: Lock stable objects where appropriate and available.

Figure 11: Original instructional visual for Object Order, Grouping and Organisation.

Step-by-Step Guided Practical

1. Create a background, image placeholder and text.
2. Change stacking order.
3. Group two related items.
4. Move the group.
5. Rename important objects if the interface supports it.

Ethan Digital Academy Case Study

A flyer header can be grouped so its logo, label and headline remain together during layout changes.

Review Questions

60. What is the main purpose of object order, grouping and organisation?
61. State two professional vector-design practices from this lesson.
62. What common quality or copyright mistake should be avoided?
63. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 11 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 12: Combining and Shaping Objects

Introduction

Vector applications can combine overlapping geometry to build more complex original forms.

Learning Objectives

- Explain the main principles of combining and shaping objects.
- Complete a guided CorelDRAW practical for combining and shaping objects.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Weld/union-style operations merge forms.

Key principle: Trim/subtract-style operations remove overlapping areas.

Key principle: Intersect-style operations create shared areas.

Key principle: Keep a copy before irreversible shaping if later editing may be needed.

Key principle: Use shaping to support clear design, not complexity for its own sake.

Step-by-Step Guided Practical

1. Create two overlapping circles.
2. Duplicate them before shaping.
3. Try an instructor-approved combine operation.
4. Compare the new object with the originals.
5. Use simple geometry to create an original icon.

Ethan Digital Academy Case Study

A simple technology symbol can be constructed from original geometry without tracing a protected logo.

Review Questions

64. What is the main purpose of combining and shaping objects?
65. State two professional vector-design practices from this lesson.
66. What common quality or copyright mistake should be avoided?
67. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 12 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 13: Transparency, Gradients and Simple Effects

Introduction

Effects can add depth or emphasis but should remain controlled and appropriate.

Learning Objectives

- Explain the main principles of transparency, gradients and simple effects.
- Complete a guided CorelDRAW practical for transparency, gradients and simple effects.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Transparency reduces object visibility.

Key principle: Gradients transition between colours.

Key principle: Shadows can separate objects from backgrounds.

Key principle: Effects should not reduce readability.

Key principle: Flat design is often stronger than excessive effects.

Step-by-Step Guided Practical

1. Apply a simple gradient to a practice shape.
2. Reduce transparency on a second shape.
3. Add a subtle shadow if available.
4. Compare with a flat version.
5. Keep the version that communicates more clearly.

Ethan Digital Academy Case Study

A course badge may use a subtle gradient while retaining clear text and brand consistency.

Review Questions

68. What is the main purpose of transparency, gradients and simple effects?
69. State two professional vector-design practices from this lesson.
70. What common quality or copyright mistake should be avoided?
71. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 13 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 14: Importing Images and Working with Bitmaps

Introduction

Raster images can be placed into CorelDRAW layouts alongside vector objects.

Learning Objectives

- Explain the main principles of importing images and working with bitmaps.
- Complete a guided CorelDRAW practical for importing images and working with bitmaps.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Import only authorised images.

Key principle: Raster image quality depends on pixel dimensions.

Key principle: Cropping can improve composition.

Key principle: Do not enlarge small raster images excessively.

Key principle: Keep image links/embedding and final output workflow organised.

Step-by-Step Guided Practical

1. Import an authorised photo.
2. Resize it proportionally.
3. Crop or frame it within the layout.
4. Add a vector caption panel.
5. Inspect the photo at normal output size.

Ethan Digital Academy Case Study

An Academy event photo can be combined with vector text and shapes for a promotional poster.

Review Questions

72. What is the main purpose of importing images and working with bitmaps?
73. State two professional vector-design practices from this lesson.
74. What common quality or copyright mistake should be avoided?
75. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 14 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 15: Simple Logo and Icon Design

Introduction

Logo practice teaches simplification, scalability and originality.

Learning Objectives

- Explain the main principles of simple logo and icon design.
- Complete a guided CorelDRAW practical for simple logo and icon design.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Begin with a concept, not an effect.

Key principle: Use simple geometry and clean curves.

Key principle: Test at small and large sizes.

Key principle: Create light and dark-background variants.

Key principle: Do not copy, trace or imitate protected logos.

Figure 15: Original instructional visual for Simple Logo and Icon Design.

Step-by-Step Guided Practical

1. Write three keywords for a fictional practice brand.
2. Sketch two original symbol ideas.
3. Build one using simple geometry.
4. Add an authorised type treatment.
5. Test the result at small size.

Ethan Digital Academy Case Study

Learners can create a fictional training-club mark while respecting existing trademarks and brand identities.

Review Questions

76. What is the main purpose of simple logo and icon design?
77. State two professional vector-design practices from this lesson.
78. What common quality or copyright mistake should be avoided?
79. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 15 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 16: Flyer and Poster Layout

Introduction

Vector layout combines hierarchy, typography, images, colour and alignment into a complete communication piece.

Learning Objectives

- Explain the main principles of flyer and poster layout.
- Complete a guided CorelDRAW practical for flyer and poster layout.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Lead with the main message.

Key principle: Group related logistics.

Key principle: Use a clear visual path.

Key principle: Keep contact information accurate.

Key principle: Design at the intended output size.

Step-by-Step Guided Practical

1. Create a practice course flyer.
2. Add headline, benefit, date and CTA.
3. Use one authorised image or original vector motif.
4. Align content using guides.
5. Run a spelling and spacing review.

Ethan Digital Academy Case Study

An Ethan open-day flyer should communicate the event and next action within seconds.

Review Questions

80. What is the main purpose of flyer and poster layout?
81. State two professional vector-design practices from this lesson.
82. What common quality or copyright mistake should be avoided?
83. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 16 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 17: Print Preparation Basics

Introduction

Print-oriented design requires technical checks before sending artwork to a printer.

Learning Objectives

- Explain the main principles of print preparation basics.
- Complete a guided CorelDRAW practical for print preparation basics.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Confirm final page size.

Key principle: Ask the printer about bleed, colour and PDF requirements.

Key principle: Keep important content inside safe areas.

Key principle: Images should be suitable for intended output quality.

Key principle: Proofread and inspect the exported PDF.

Step-by-Step Guided Practical

1. Review a practice A4 flyer.
2. Check page size and margins.
3. Identify content too close to an edge.
4. Export a practice PDF using instructor-approved settings.
5. Open the PDF and inspect it.

Ethan Digital Academy Case Study

Academy should confirm a commercial printer's exact specifications rather than assuming every print workflow is identical.

Review Questions

84. What is the main purpose of print preparation basics?
85. State two professional vector-design practices from this lesson.
86. What common quality or copyright mistake should be avoided?
87. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 17 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 18: Export for Digital Use

Introduction

Digital outputs need suitable dimensions, formats and file sizes.

Learning Objectives

- Explain the main principles of export for digital use.
- Complete a guided CorelDRAW practical for export for digital use.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: PNG is useful for many sharp graphics and transparency.

Key principle: JPG is common for flattened photographic content.

Key principle: PDF can be useful for documents and sharing.

Key principle: Keep the editable CDR master.

Key principle: Inspect exported files before publication.

Figure 18: Original instructional visual for Export for Digital Use.

Step-by-Step Guided Practical

1. Prepare a square practice design.
2. Export PNG.
3. Export JPG where suitable.
4. Compare file size and appearance.
5. Store approved output separately from the master.

Ethan Digital Academy Case Study

Ethan social graphics can be exported for mobile viewing while retaining the original vector design file.

Review Questions

88. What is the main purpose of export for digital use?
89. State two professional vector-design practices from this lesson.
90. What common quality or copyright mistake should be avoided?
91. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 18 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Lesson 19: Final CorelDRAW Promotional Package

Introduction

The final project combines original vector construction, typography, image placement, layout, export and organised handoff.

Learning Objectives

- Explain the main principles of final coreldraw promotional package.
- Complete a guided CorelDRAW practical for final coreldraw promotional package.
- Apply the skill to an Ethan Digital Academy design task.

Teaching Content

Key principle: Create a campaign from a clear brief.

Key principle: Use original vector shapes or motifs.

Key principle: Maintain consistent typography and colour.

Key principle: Produce both print-oriented and digital outputs.

Key principle: Submit editable masters and final exports.

Figure 19: Original instructional visual for Final CorelDRAW Promotional Package.

Step-by-Step Guided Practical

1. Write a campaign brief.
2. Create an original vector motif or icon.
3. Design an A4 flyer/poster.
4. Adapt it to a square social post.
5. Run content and alignment checks.
6. Export PDF and PNG/JPG versions as appropriate.
7. Submit the CDR master, exports and one-page rationale.

Ethan Digital Academy Case Study

The capstone demonstrates the ability to produce a coordinated, editable vector design package for Ethan Digital Academy.

Review Questions

92. What is the main purpose of final coreldraw promotional package?
93. State two professional vector-design practices from this lesson.
94. What common quality or copyright mistake should be avoided?
95. How would you apply this lesson to an Academy design?

Assignment

Complete the Lesson 19 practical using original or authorised assets. Submit the editable CorelDRAW practice file or instructor-approved evidence, a final preview, and a short explanation of your design choices.

Final Practical Project - 100 Marks

Component	Marks	Requirement
Brief	10	Audience, purpose and required outputs.
Original vector motif	15	Clean original geometry/curves.
Typography and colour	15	Readable hierarchy and consistent palette.
Flyer/poster	20	Strong layout and complete information.
Digital adaptation	15	Effective square social version.
Technical preparation	10	Correct page setup and suitable exports.
Responsible asset use	5	Original/licensed content only.
Rationale and handoff	10	Organised master, exports and explanation.

Course Quiz - 30 Questions

1. What is vector graphics?
2. What is raster graphics?
3. Give one advantage of vector artwork.
4. Name four CorelDRAW workspace areas.
5. Why should page size be set early?
6. Name three basic vector shapes.
7. What is proportional scaling?
8. What is a node?
9. What is a curve handle?
10. What is a fill?
11. What is an outline?
12. Why is colour contrast important?
13. What is text hierarchy?
14. What is alignment?
15. What is distribution?
16. What is grouping?
17. What does object order control?
18. What is a weld/union-style shaping operation?
19. What is transparency?
20. What is a gradient?
21. Why should effects be restrained?
22. Why must imported images be authorised?
23. What happens if a small raster image is enlarged too much?
24. State two principles of simple logo design.
25. Why should protected logos not be traced?
26. Name four items required on an event flyer.
27. What should be confirmed with a commercial printer?

28. Give one use for PNG.
29. Why should the editable CDR master be retained?
30. List four deliverables or requirements in the final CorelDRAW project.

Final Examination - 100 Marks

Section A - Vector Foundations (20 marks)

Explain vector/raster graphics, workspace, page setup and basic object transformation.

Section B - Drawing and Object Editing (20 marks)

Explain shapes, nodes, curves, fills, outlines and object shaping.

Section C - Typography and Precision Layout (20 marks)

Explain text, hierarchy, alignment, distribution, guides and grouping.

Section D - Applied Design (20 marks)

Plan an original logo/icon exercise and a complete course flyer/poster.

Section E - Output and Professional Practice (20 marks)

Explain raster-image placement, print preparation, digital export, copyright responsibility and file handoff.

Course Completion Outcome

After successful completion, the learner should be able to create and organise vector artwork in CorelDRAW, work with shapes and curves, apply colour and typography, align and group objects, combine geometry into original forms, build flyers and simple identity graphics, place authorised raster images, prepare basic print-oriented files and export suitable digital outputs while preserving an editable master.

Professional Practice Checklist

- Begin with a clear brief and correct page size.
- Use original vector construction.
- Keep typography readable and aligned.
- Use consistent fills, outlines and colour.
- Organise groups and object order.
- Do not copy or trace protected logos or commercial artwork.
- Confirm printer requirements before final print export.
- Inspect final PDF/PNG/JPG outputs and keep the editable CDR master.
