Video meetings

Course Code	EDA-GWS-106
Level	Beginner to Professional Workplace Use
Duration	6 Weeks (18 Lessons)
Certificate	Professional Certificate in Google Workspace
Prerequisite	Computer Appreciation / Digital Literacy
Learning Format	Classroom + Guided Practicals + Final Workspace Project

This manual is designed for paid Ethan Digital Academy learners. Practicals use fictional or non-sensitive information. Google product interfaces can change over time, so focus on the underlying workflow and good practice.

Course Introduction

Google Workspace brings communication, cloud storage, document creation, spreadsheets, presentations, forms, scheduling and online meetings into one connected environment. This course teaches learners how to use the major tools confidently for school, work, business and collaborative projects.

Learning Objectives

- Navigate the main Google Workspace tools and understand what each one is for.
- Organise and share cloud files responsibly using Google Drive.
- Create professional documents, spreadsheets and presentations.
- Collect structured information with Forms and manage schedules with Calendar.
- Communicate professionally with Gmail and participate effectively in Meet.
- Combine several Workspace tools into a practical academic or workplace workflow.

Course Structure

1. Lesson 1: Introduction to Google Workspace
2. Lesson 2: Google Accounts, Sign-In and Account Safety
3. Lesson 3: Google Drive Fundamentals
4. Lesson 4: Sharing Files and Managing Permissions
5. Lesson 5: Google Docs - Creating Professional Documents
6. Lesson 6: Google Docs - Collaboration, Comments and Version History
7. Lesson 7: Google Sheets - Spreadsheet Foundations
8. Lesson 8: Google Sheets - Formulas and Essential Functions
9. Lesson 9: Google Sheets - Data Organisation, Charts and Analysis
10. Lesson 10: Google Slides - Building Effective Presentations
11. Lesson 11: Google Forms - Collecting Information
12. Lesson 12: Google Calendar - Scheduling and Time Management
13. Lesson 13: Google Meet - Professional Online Meetings
14. Lesson 14: Gmail for Professional Communication
15. Lesson 15: Google Keep, Tasks and Everyday Productivity
16. Lesson 16: Integrated Collaboration Workflow
17. Lesson 17: File Export, Offline Considerations and Good Practice
18. Lesson 18: Final Google Workspace Project

Lesson 1: Introduction to Google Workspace

Introduction

Google Workspace is a collection of cloud-based productivity and collaboration tools. It allows learners, schools and organisations to communicate, create documents, analyse information, make presentations, store files and work together from connected devices.

Learning Objectives

- Explain the key ideas in introduction to google workspace.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Cloud productivity means your work can be stored online and accessed from supported devices after signing in.

Key point: Major Workspace tools include Gmail, Drive, Docs, Sheets, Slides, Forms, Calendar and Meet.

Key point: A Google Account provides identity and access. Organisational Workspace accounts may have additional controls managed by an administrator.

Key point: Workspace is especially useful when several people need to work on the same information without passing many file copies around.

Figure 1: Instructional view for Introduction to Google Workspace.

Step-by-Step Guided Practical

1. Sign in to a practice Google Account.
2. Open the Google apps launcher.
3. Identify Gmail, Drive, Docs, Sheets, Slides, Calendar and Meet.
4. Write one business or school use for each tool.

Ethan Digital Academy Case Study

Ethan Digital Academy can use Workspace to organise course documents, communicate with learners, schedule classes and collaborate on teaching materials.

Review Questions

19. What is the main purpose of introduction to google workspace?
20. Name two good practices from this lesson.
21. What mistake could reduce the quality or safety of this workflow?
22. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 1, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 2: Google Accounts, Sign-In and Account Safety

Introduction

A Google Account is the identity used to access Google services. Good account security protects email, files, calendars and other connected information.

Learning Objectives

- Explain the key ideas in google accounts, sign-in and account safety.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Use a strong, unique password and never share it with classmates or colleagues.

Key point: Enable multi-factor authentication when available.

Key point: Check the account name before uploading private or organisational files.

Key point: Sign out on shared computers and avoid saving passwords on public devices.

Key point: Recovery information should be kept current so legitimate account recovery is easier.

Step-by-Step Guided Practical

1. Open the Google Account page from the profile menu.
2. Review basic security options without changing settings you do not understand.
3. Check whether you are using a personal or school/work account.
4. Practise signing out and signing in again on your own device.

Ethan Digital Academy Case Study

A learner should not use another person's account to submit work. Each user should work through their own authorised account.

Review Questions

23. What is the main purpose of google accounts, sign-in and account safety?
24. Name two good practices from this lesson.
25. What mistake could reduce the quality or safety of this workflow?
26. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 2, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 3: Google Drive Fundamentals

Introduction

Google Drive is the cloud storage centre of Google Workspace. It stores files and folders and provides links to Docs, Sheets, Slides and other Workspace content.

Learning Objectives

- Explain the key ideas in google drive fundamentals.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: My Drive is the main area for files you own or organise.

Key point: Folders provide structure; useful names reduce confusion.

Key point: Drive search can locate items by name, type and other properties.

Key point: Files can be starred or moved into suitable folders for faster access.

Key point: Cloud storage does not remove the need for sensible backup and retention policies.

Figure 3: Instructional view for Google Drive Fundamentals.

Step-by-Step Guided Practical

1. Create a folder named EDA Workspace Practice.
2. Inside it create folders named Documents, Spreadsheets, Presentations and Forms.
3. Upload one harmless practice file.
4. Rename the file clearly and move it into the correct folder.

Ethan Digital Academy Case Study

Ethan Digital Academy could maintain a folder for each course, with subfolders for lesson notes, attendance, assessments and approved learner resources.

Review Questions

27. What is the main purpose of google drive fundamentals?
28. Name two good practices from this lesson.
29. What mistake could reduce the quality or safety of this workflow?
30. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 3, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 4: Sharing Files and Managing Permissions

Introduction

Sharing allows other people to access a Drive file without sending separate copies. Permission choice determines what each collaborator can do.

Learning Objectives

- Explain the key ideas in sharing files and managing permissions.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Viewer access is appropriate when a person only needs to read.

Key point: Commenter access supports feedback without direct editing.

Key point: Editor access should be limited to people who genuinely need to change content.

Key point: Restricted sharing is safer for internal or sensitive material.

Key point: Before sending a link, confirm both the recipient and the permission level.

Sharing Permissions

Choose the minimum access a collaborator needs

Viewer Can read only	Commenter Can read and comment
Editor Can change content	Restricted Only named people can open

Figure 4: Instructional view for Sharing Files and Managing Permissions.

Step-by-Step Guided Practical

1. Create a practice Doc.
2. Open Share and inspect the available roles.
3. Choose Restricted sharing for the exercise.
4. Explain what would happen if Viewer were changed to Editor.
5. Do not share personal information as part of the practical.

Ethan Digital Academy Case Study

Course policies may be shared as Viewer, while authorised instructors may receive Editor access to collaborative teaching plans.

Review Questions

31. What is the main purpose of sharing files and managing permissions?
32. Name two good practices from this lesson.
33. What mistake could reduce the quality or safety of this workflow?
34. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 4, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 5: Google Docs - Creating Professional Documents

Introduction

Google Docs is a word-processing application for writing and formatting documents in a browser. It supports collaborative editing and automatic cloud saving.

Learning Objectives

- Explain the key ideas in google docs - creating professional documents.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: A document should have a clear title, logical headings and readable paragraphs.

Key point: Formatting tools include fonts, size, alignment, lists, spacing and styles.

Key point: Page setup and print settings affect how a document appears when exported or printed.

Key point: Templates can speed up common document tasks, but content should still be reviewed.

Key point: Professional documents favour consistency over excessive decoration.

Figure 5: Instructional view for Google Docs - Creating Professional Documents.

Step-by-Step Guided Practical

1. Create a document titled Ethan Digital Academy Course Notice.
2. Add a heading, two short paragraphs and a bulleted list.
3. Apply a consistent heading style.
4. Use spell check to review the document.
5. Download a practice copy as PDF.

Ethan Digital Academy Case Study

Docs can be used for course outlines, memos, meeting notes, learner instructions and policy drafts.

Review Questions

35. What is the main purpose of google docs - creating professional documents?
36. Name two good practices from this lesson.
37. What mistake could reduce the quality or safety of this workflow?
38. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 5, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 6: Google Docs - Collaboration, Comments and Version History

Introduction

Docs becomes especially powerful when several authorised people collaborate. Comments, suggestions and version history make review easier to manage.

Learning Objectives

- Explain the key ideas in google docs - collaboration, comments and version history.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Comments attach discussion to specific content.

Key point: Suggestion mode proposes edits that can later be accepted or rejected.

Key point: Version history helps users understand how a document changed over time.

Key point: @mentions may help direct a comment to a collaborator where supported.

Key point: Collaborators should resolve comments only after the issue has genuinely been addressed.

Step-by-Step Guided Practical

1. In a practice document add a comment to one sentence.
2. Switch to Suggesting mode and make a small correction.
3. Inspect version history.
4. Name the current version if the option is available.
5. Explain the difference between editing and suggesting.

Ethan Digital Academy Case Study

An instructor can draft a lesson note while an academic reviewer comments and suggests improvements before publication.

Review Questions

39. What is the main purpose of google docs - collaboration, comments and version history?
40. Name two good practices from this lesson.
41. What mistake could reduce the quality or safety of this workflow?

42. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 6, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 7: Google Sheets - Spreadsheet Foundations

Introduction

Google Sheets is a spreadsheet application for organising, calculating and analysing structured information. Data is stored in cells arranged in rows and columns.

Learning Objectives

- Explain the key ideas in google sheets - spreadsheet foundations.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: A cell has an address such as A1 or C5.

Key point: A range is a group of cells, such as A2:A10.

Key point: Text, numbers and dates should be entered consistently.

Key point: Formatting improves readability but does not replace accurate data.

Key point: Freeze, sort and filter tools help users work with larger tables.

Figure 7: Instructional view for Google Sheets - Spreadsheet Foundations.

Step-by-Step Guided Practical

1. Create columns for Learner, Course, Score and Status.
2. Enter five fictional learners and scores.
3. Format the heading row.
4. Sort the scores from highest to lowest.
5. Apply a filter and practise showing one status.

Ethan Digital Academy Case Study

A training centre can use Sheets for authorised attendance summaries, course schedules and non-sensitive practice datasets.

Review Questions

43. What is the main purpose of google sheets - spreadsheet foundations?
44. Name two good practices from this lesson.
45. What mistake could reduce the quality or safety of this workflow?
46. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 7, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 8: Google Sheets - Formulas and Essential Functions

Introduction

Formulas turn a worksheet from a simple table into a calculation tool. A formula normally begins with an equals sign.

Learning Objectives

- Explain the key ideas in google sheets - formulas and essential functions.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Arithmetic formulas can add, subtract, multiply and divide cell values.

Key point: SUM adds a range of numbers.

Key point: AVERAGE calculates the arithmetic mean.

Key point: MIN and MAX return the smallest and largest values.

Key point: COUNT counts cells containing numbers. Formulas should reference cells rather than repeatedly typing values.

Essential Sheets Functions

Common functions for everyday work

SUM

Adds values

AVERAGE

Finds mean

MIN / MAX

Smallest / largest

COUNT

Counts numeric cells

Figure 8: Instructional view for Google Sheets - Formulas and Essential Functions.

Step-by-Step Guided Practical

1. Enter five fictional scores in B2:B6.
2. Calculate total with =SUM(B2:B6).
3. Calculate average with =AVERAGE(B2:B6).
4. Find minimum and maximum with MIN and MAX.
5. Change one score and observe how the formulas update.

Ethan Digital Academy Case Study

Ethan Digital Academy could calculate class totals and averages from authorised assessment data rather than calculating each result manually.

Review Questions

47. What is the main purpose of google sheets - formulas and essential functions?
48. Name two good practices from this lesson.
49. What mistake could reduce the quality or safety of this workflow?
50. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 8, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 9: Google Sheets - Data Organisation, Charts and Analysis

Introduction

Good spreadsheet analysis starts with clean, well-organised data. Charts then help communicate patterns, comparisons and trends.

Learning Objectives

- Explain the key ideas in google sheets - data organisation, charts and analysis.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Keep one type of information per column.

Key point: Avoid blank rows inside a continuous dataset unless there is a clear reason.

Key point: Sort changes record order; filtering temporarily hides records that do not match criteria.

Key point: Charts should match the question: column charts compare categories, while line charts often show change over time.

Key point: Always label charts clearly so viewers know what is being measured.

Step-by-Step Guided Practical

1. Use a fictional monthly enrolment table.
2. Sort months or categories correctly.
3. Insert a simple column chart.
4. Add a meaningful chart title.
5. Write two observations supported by the chart.

Ethan Digital Academy Case Study

Management can use a dashboard-style Sheet to review enrolment trends without exposing unnecessary personal details.

Review Questions

51. What is the main purpose of google sheets - data organisation, charts and analysis?
52. Name two good practices from this lesson.

53. What mistake could reduce the quality or safety of this workflow?
54. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 9, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 10: Google Slides - Building Effective Presentations

Introduction

Google Slides is used to create visual presentations. Effective slides support a speaker or learning activity rather than crowding every detail onto the screen.

Learning Objectives

- Explain the key ideas in google slides - building effective presentations.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Start with an outline before designing slides.

Key point: Use one main idea per slide whenever practical.

Key point: Choose readable font sizes and strong contrast.

Key point: Images and charts should support the message, not merely decorate the slide.

Key point: Use consistent layouts, spacing and visual hierarchy.

Figure 10: Instructional view for Google Slides - Building Effective Presentations.

Step-by-Step Guided Practical

1. Create a five-slide presentation about a digital skill.
2. Use title, agenda, two content slides and a conclusion.
3. Apply one consistent theme.
4. Insert one relevant shape or original graphic.
5. Present the slides in slideshow mode.

Ethan Digital Academy Case Study

Ethan Digital Academy can use Slides for classroom teaching, orientation sessions and programme presentations.

Review Questions

55. What is the main purpose of google slides - building effective presentations?
56. Name two good practices from this lesson.
57. What mistake could reduce the quality or safety of this workflow?
58. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 10, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 11: Google Forms - Collecting Information

Introduction

Google Forms creates online forms, surveys and quizzes. Responses are collected in a structured format and can be reviewed in Forms or linked to Sheets.

Learning Objectives

- Explain the key ideas in google forms - collecting information.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Question types include short answer, paragraph, multiple choice, checkboxes and dropdowns.

Key point: Required questions should be used only when the information is genuinely necessary.

Key point: Clear wording improves response quality.

Key point: Forms should avoid collecting unnecessary personal or sensitive information.

Key point: Response settings should be reviewed before a form is distributed.

Figure 11: Instructional view for Google Forms - Collecting Information.

Step-by-Step Guided Practical

1. Create a fictional Course Feedback form.
2. Add name or alias, course choice, rating and one comment question.
3. Mark only essential questions as required.
4. Preview the form.
5. Submit one fictional test response and review the response summary.

Ethan Digital Academy Case Study

A feedback form can help the Academy evaluate teaching quality while keeping the questionnaire focused on relevant information.

Review Questions

59. What is the main purpose of google forms - collecting information?
60. Name two good practices from this lesson.
61. What mistake could reduce the quality or safety of this workflow?
62. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 11, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 12: Google Calendar - Scheduling and Time Management

Introduction

Google Calendar organises events, appointments and reminders. Shared scheduling can reduce missed classes and meeting confusion.

Learning Objectives

- Explain the key ideas in google calendar - scheduling and time management.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: An event should include a clear title, correct date and time, and useful description.

Key point: Guests can be invited when collaboration is required.

Key point: Notifications provide advance reminders.

Key point: Recurring events are useful for repeated classes or meetings.

Key point: Time-zone awareness matters when participants are in different locations.

Figure 12: Instructional view for Google Calendar - Scheduling and Time Management.

Step-by-Step Guided Practical

1. Create a fictional Digital Skills Class event.
2. Set a future date and duration.
3. Add a short agenda in the description.
4. Add a reminder.
5. Create a second practice event and compare one-time versus recurring options.

Ethan Digital Academy Case Study

The Academy can schedule classes, staff meetings and assessment dates while giving participants a consistent calendar reference.

Review Questions

63. What is the main purpose of google calendar - scheduling and time management?
64. Name two good practices from this lesson.
65. What mistake could reduce the quality or safety of this workflow?
66. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 12, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 13: Google Meet - Professional Online Meetings

Introduction

Google Meet supports online video meetings. Good meeting practice combines technical preparation with respectful communication.

Learning Objectives

- Explain the key ideas in google meet - professional online meetings.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Test audio, camera and internet connection before an important meeting.

Key point: Use a recognisable display name appropriate to the setting.

Key point: Mute when background noise would interrupt others.

Key point: Use chat, reactions or hand-raise features appropriately where available.

Key point: Never record or redistribute a meeting without the necessary permission.

Figure 13: Instructional view for Google Meet - Professional Online Meetings.

Step-by-Step Guided Practical

1. Create or open a practice Meet link without inviting strangers.
2. Check microphone and camera controls.
3. Locate captions, chat and participant controls if available.
4. Practise muting and unmuting.
5. Write a five-point online meeting etiquette checklist.

Ethan Digital Academy Case Study

An instructor can use Meet for remote lessons while sharing a Slides presentation or demonstrating a document.

Review Questions

67. What is the main purpose of google meet - professional online meetings?
68. Name two good practices from this lesson.
69. What mistake could reduce the quality or safety of this workflow?
70. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 13, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 14: Gmail for Professional Communication

Introduction

Gmail is Google's email service. Professional email is clear, purposeful and respectful, with careful handling of recipients and attachments.

Learning Objectives

- Explain the key ideas in gmail for professional communication.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: A useful subject line tells the recipient what the message concerns.

Key point: The message should include a greeting, concise body and appropriate closing.

Key point: CC is for visible secondary recipients; BCC hides recipient addresses from other recipients and should be used responsibly.

Key point: Attachments should be checked before sending.

Key point: Phishing awareness is essential: verify unexpected requests, links and attachments.

Step-by-Step Guided Practical

1. Draft an email titled Course Schedule Update without sending it.
2. Write a professional greeting and three-sentence body.
3. Attach a harmless practice document.
4. Check the recipient field, subject and attachment.
5. Delete the draft after review if it is not needed.

Ethan Digital Academy Case Study

The Academy can use email for formal learner notices, instructor communication and approved administrative updates.

Review Questions

71. What is the main purpose of gmail for professional communication?
72. Name two good practices from this lesson.

73. What mistake could reduce the quality or safety of this workflow?
74. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 14, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 15: Google Keep, Tasks and Everyday Productivity

Introduction

Workspace productivity also involves capturing ideas and tracking small actions. Google Keep and Tasks can support simple personal organisation where available.

Learning Objectives

- Explain the key ideas in google keep, tasks and everyday productivity.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Keep is useful for short notes, checklists and reminders.

Key point: Tasks supports actionable items and due dates.

Key point: A note is not a substitute for a properly stored official document.

Key point: Avoid placing passwords or confidential information in casual notes.

Key point: Review and clear completed items so lists remain useful.

Step-by-Step Guided Practical

1. Create a practice checklist for preparing a class.
2. Add five harmless tasks.
3. Set one practice due date if available.
4. Mark one item complete.
5. Decide which information belongs in a note and which belongs in Drive.

Ethan Digital Academy Case Study

An instructor may use a personal checklist for lesson preparation while storing the official lesson plan in the authorised Drive folder.

Review Questions

75. What is the main purpose of google keep, tasks and everyday productivity?
76. Name two good practices from this lesson.
77. What mistake could reduce the quality or safety of this workflow?

78. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 15, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 16: Integrated Collaboration Workflow

Introduction

The main value of Workspace appears when tools are connected into a coherent workflow rather than used separately.

Learning Objectives

- Explain the key ideas in integrated collaboration workflow.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Calendar can schedule the activity, Drive stores its files, Docs/Sheets/Slides create the content, Forms collects structured responses, Gmail communicates, and Meet supports remote interaction.

Key point: A clear folder and naming system prevents duplication.

Key point: Permissions should follow each person's role.

Key point: Version history and comments support review.

Key point: The workflow should be simple enough that authorised users can follow it consistently.

Figure 16: Instructional view for Integrated Collaboration Workflow.

Step-by-Step Guided Practical

1. Create a folder called Digital Training Project.
2. Add one Doc, one Sheet and one Slides file.
3. Create a Calendar event referring to the project.
4. Design a short feedback Form.
5. Write the steps a teammate would follow from planning to completion.

Ethan Digital Academy Case Study

For a new course, Ethan Digital Academy can plan dates in Calendar, prepare content collaboratively, store approved files in Drive and collect feedback through Forms.

Review Questions

79. What is the main purpose of integrated collaboration workflow?
80. Name two good practices from this lesson.
81. What mistake could reduce the quality or safety of this workflow?
82. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 16, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 17: File Export, Offline Considerations and Good Practice

Introduction

Cloud applications still need sensible file-management practices. Users may sometimes need downloadable copies, printed documents or access planning for unreliable connectivity.

Learning Objectives

- Explain the key ideas in file export, offline considerations and good practice.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: Docs, Sheets and Slides support common download/export formats, although formatting may change between applications.

Key point: PDF is useful when a fixed-layout reading copy is needed.

Key point: Keep original editable files when future changes are expected.

Key point: Offline access, where supported and properly configured, should be tested before it is needed.

Key point: Use clear file names and avoid uncontrolled duplicate versions such as final-final-new2.

Step-by-Step Guided Practical

1. Open a practice Doc and inspect Download options.
2. Export one practice file as PDF.
3. Rename the original using a clear naming convention.
4. Place exported and editable versions in suitable folders.
5. Explain why an editable master and a PDF copy may both be useful.

Ethan Digital Academy Case Study

The Academy can keep an editable approved master and provide learners with a PDF reading copy where appropriate.

Review Questions

83. What is the main purpose of file export, offline considerations and good practice?
84. Name two good practices from this lesson.

85. What mistake could reduce the quality or safety of this workflow?
86. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 17, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Lesson 18: Final Google Workspace Project

Introduction

The final project brings the course together. The learner will design a small Workspace system for a fictional Ethan Digital Academy training programme.

Learning Objectives

- Explain the key ideas in final google workspace project.
- Apply the lesson in a guided Google Workspace practical.
- Use good organisation, collaboration and information-handling practice.

Teaching Content

Key point: The project must demonstrate organisation, collaboration, calculation, presentation, scheduling and responsible information handling.

Key point: Use fictional learner information only.

Key point: The quality of the workflow matters more than decorative complexity.

Key point: Files should be named consistently and placed in a logical folder structure.

Key point: Before submission, test links, permissions, formulas and presentation readability.

Figure 18: Instructional view for Final Google Workspace Project.

Step-by-Step Guided Practical

1. Create a Drive folder for a fictional course.
2. Create a Docs course information sheet.
3. Create a Sheets learner tracker with formulas.
4. Create a five-slide Slides presentation.
5. Create a Forms feedback form and a Calendar class event.
6. Prepare a one-page explanation of how all components work together.

Ethan Digital Academy Case Study

This project simulates a realistic academic administration workflow without using real learner personal data.

Review Questions

87. What is the main purpose of final google workspace project?
88. Name two good practices from this lesson.
89. What mistake could reduce the quality or safety of this workflow?
90. How could this lesson be applied in a school or workplace?

Assignment

Complete the guided practical for Lesson 18, save the result with a clear file name, and write 100-150 words explaining what you learned and how you would use it in a real academic or workplace task.

Final Practical Project - 100 Marks

Create a complete Google Workspace system for a fictional Ethan Digital Academy course. Use fictional learner information only.

Component	Marks	Requirement
Drive organisation	15	Logical folder structure and clear file naming.
Google Docs	15	Professional one-page course information document.
Google Sheets	20	Learner tracker with at least two correct formulas and readable formatting.
Google Slides	15	Five-slide course presentation with consistent design.
Google Forms	10	Feedback or registration form with appropriate question types.
Calendar and Meet planning	10	Scheduled class event with useful description and meeting plan.
Sharing and permissions	10	Correct explanation of Viewer, Commenter and Editor choices.
Reflection	5	Short explanation of how the tools work together.

Course Quiz - 30 Questions

1. What is Google Workspace?
2. Which Workspace tool is mainly used for cloud file storage?
3. What does Viewer permission allow?
4. What is the purpose of Commenter permission?
5. Which tool is used for word processing?
6. What is version history used for?
7. What is a spreadsheet cell?
8. Which symbol normally starts a spreadsheet formula?
9. What does SUM do?
10. What does AVERAGE calculate?
11. Which tool is mainly used for presentations?
12. Why should slides avoid too much text?
13. Which tool creates online forms?
14. Why should a form avoid collecting unnecessary personal information?
15. Which tool is used for scheduling events?
16. What is a recurring event?
17. Which tool supports video meetings?
18. State one good online-meeting habit.
19. What makes an email subject line useful?
20. What should you check before sending an attachment?
21. What is the purpose of a Drive folder?
22. Why are clear file names important?
23. What is the difference between editing and suggesting in Docs?
24. What is a range in Sheets?
25. Name one chart type useful for comparing categories.
26. What is the value of linking Forms responses to Sheets?
27. Why should Editor permission be limited?

28. What is the benefit of using several Workspace tools in one workflow?
29. Why might you export a document as PDF?
30. State one way to protect a Google Account.

Final Examination - 100 Marks

Section A - Concepts (20 marks)

Answer four questions. Explain Google Workspace, cloud collaboration, Drive permissions, account security, and professional email practice.

Section B - Google Docs and Drive (20 marks)

Describe how to create, organise, share, review and export a professional document.

Section C - Google Sheets (20 marks)

Using a fictional score table, explain cells, ranges, SUM, AVERAGE, MIN, MAX, sorting, filtering and chart selection.

Section D - Communication and Scheduling (20 marks)

Explain how Gmail, Calendar and Meet can support a professional training programme.

Section E - Integrated Workflow (20 marks)

Design a Google Workspace workflow for a fictional Ethan Digital Academy short course. Show which tools you would use, why, and how permissions would be controlled.

Course Completion Outcome

After successfully completing this course, the learner should be able to use the major Google Workspace applications for everyday academic and workplace productivity; organise and share files responsibly; create collaborative documents, spreadsheets and presentations; collect structured responses; schedule activities; communicate professionally; and combine Workspace tools into a coherent project workflow.

Professional Practice Checklist

- Use strong account-security habits.
- Keep Drive folders and file names organised.
- Share only with the access level required.
- Use fictional or authorised data during training.
- Check formulas, recipients, attachments and permissions before final submission.
- Maintain professional communication and collaboration standards.
