

INTERNET & EMAIL SKILLS

FULL VISUAL STUDY MANUAL

How the Internet Connects

A simplified journey from your device to an online service

Device

Laptop, phone or tablet

Router / Network

Connects the device to a network

Internet Provider

Carries traffic to the wider internet

Online Service

Website, email or cloud application

Course Code	EDA-IES-107
Level	Beginner to Professional Everyday Use
Duration	6 Weeks (19 Lessons)
Certificate	Professional Certificate in Internet & Email Skills
Prerequisite	Computer Appreciation / Digital Literacy
Learning Format	Classroom + Guided Practicals + Final Communication Project

This manual teaches practical, safe and professional internet and email use. All exercises should use authorised accounts, fictional practice identities and non-sensitive information.

Course Introduction

Internet and email skills are essential for modern education, work and business. This course develops confident browsing, effective research, professional email communication, file handling, privacy awareness, account security and responsible online behaviour.

Learning Objectives

- Explain how the internet, web browsers and websites work at an everyday-user level.
- Search for information efficiently and evaluate online sources.
- Download, upload and organise files responsibly.
- Write, send and manage professional email.
- Recognise common phishing and scam warning signs without interacting with suspicious systems.
- Protect accounts, privacy and digital reputation.
- Combine research, files, email and scheduling into a complete workflow.

Course Structure

1. Lesson 1: Internet Foundations and Everyday Uses
2. Lesson 2: Web Browsers, Tabs and Web Addresses
3. Lesson 3: Searching the Web Effectively
4. Lesson 4: Evaluating Online Information and Misinformation
5. Lesson 5: Downloading, Uploading and Managing Online Files
6. Lesson 6: Email Foundations and Email Addresses
7. Lesson 7: Writing Professional Emails
8. Lesson 8: Attachments, Links and Safe File Sharing
9. Lesson 9: Inbox Organisation, Search and Email Management
10. Lesson 10: Phishing, Scams and Suspicious Messages
11. Lesson 11: Passwords, MFA and Account Recovery
12. Lesson 12: Privacy, Cookies and Digital Footprints
13. Lesson 13: Wi-Fi, Public Computers and Safer Connections
14. Lesson 14: Video Calls, Messaging and Online Etiquette
15. Lesson 15: Online Forms, Registrations and Transactions
16. Lesson 16: Email Productivity and Calendar Follow-Up
17. Lesson 17: Responsible Internet Use, Copyright and Online Conduct
18. Lesson 18: Integrated Internet and Email Workflow
19. Lesson 19: Final Internet & Email Skills Project

Lesson 1: Internet Foundations and Everyday Uses

Introduction

The internet is a global system of interconnected networks that allows devices and services to exchange information. Learners use it for communication, education, research, banking, entertainment, cloud applications and many other legitimate activities.

Learning Objectives

- Explain the main concepts in internet foundations and everyday uses.
- Complete a guided practical related to internet foundations and everyday uses.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: The internet is the underlying network; the World Wide Web is one service that uses it.

Key point: A device usually connects through a local network and an internet service provider before reaching an online service.

Key point: Online services depend on connectivity, servers, software and user accounts.

Key point: Good digital practice includes protecting accounts, respecting privacy and checking information before relying on it.

How the Internet Connects

A simplified journey from your device to an online service

Device

Laptop, phone or tablet

Router / Network

Connects the device to a network

Internet Provider

Carries traffic to the wider internet

Online Service

Website, email or cloud application

Figure 1: Instructional visual for Internet Foundations and Everyday Uses.

Step-by-Step Guided Practical

1. List five legitimate ways you use the internet.
2. Identify whether each example is communication, research, cloud productivity or entertainment.
3. Draw a simple device-to-online-service connection path.
4. Explain the difference between the internet and the web.

Ethan Digital Academy Case Study

Ethan Digital Academy learners may use the internet to access learning resources, communicate with instructors and use authorised cloud applications.

Review Questions

20. What is the main purpose of internet foundations and everyday uses?
21. State two good practices from this lesson.
22. What risk or mistake should a careful user avoid?
23. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 1 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 2: Web Browsers, Tabs and Web Addresses

Introduction

A web browser is software used to access websites and web applications. Understanding the address bar, tabs, navigation controls and web addresses helps users browse more confidently.

Learning Objectives

- Explain the main concepts in web browsers, tabs and web addresses.
- Complete a guided practical related to web browsers, tabs and web addresses.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Common browser controls include Back, Forward, Refresh, Home where configured, tabs and the address bar.

Key point: A URL is the address of a web resource. The domain name is an important part of that address.

Key point: HTTPS indicates encrypted transport between browser and site, but users must still evaluate whether the site itself is legitimate.

Key point: Bookmarks can save frequently used pages; too many poorly named bookmarks become difficult to manage.

Browser and Web Address

Know what you are looking at before you click

Address bar

Shows the web address or search terms

Domain name

Identifies the website, e.g. example.org

HTTPS

Indicates encrypted web transport, not that every site claim is trustworthy

Tabs

Keep several pages open in one browser window

Figure 2: Instructional visual for Web Browsers, Tabs and Web Addresses.

Step-by-Step Guided Practical

1. Open your browser.
2. Identify the address bar, tab bar, Back, Forward and Refresh controls.
3. Open two harmless websites in separate tabs.
4. Read the domain name shown in each address bar.
5. Bookmark one trusted educational page and rename the bookmark clearly.

Ethan Digital Academy Case Study

Learners can bookmark the Academy's official learning portal instead of repeatedly searching for it and risking look-alike pages.

Review Questions

24. What is the main purpose of web browsers, tabs and web addresses?
25. State two good practices from this lesson.
26. What risk or mistake should a careful user avoid?
27. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 2 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 3: Searching the Web Effectively

Introduction

Search engines help users locate information on the web. Better searches begin with a clear question and specific keywords rather than long, vague sentences.

Learning Objectives

- Explain the main concepts in searching the web effectively.
- Complete a guided practical related to searching the web effectively.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Use important nouns, names, dates or phrases that describe the information needed.

Key point: Quotation marks may help search for an exact phrase in many search engines.

Key point: Adding a trusted organisation name can narrow results when looking for official guidance.

Key point: Search results are not automatically correct; ranking does not prove reliability.

Key point: For important facts, compare multiple trustworthy sources.

Figure 3: Instructional visual for Searching the Web Effectively.

Step-by-Step Guided Practical

1. Choose a harmless topic such as 'benefits of keyboard shortcuts'.
2. Write a broad search query, then a more specific one.
3. Compare the first page of results.
4. Identify which result appears most suitable and explain why.
5. Record the title, publisher and date of one useful source.

Ethan Digital Academy Case Study

An instructor researching a software feature should prefer official documentation or a reputable educational source rather than copying the first anonymous answer found online.

Review Questions

28. What is the main purpose of searching the web effectively?
29. State two good practices from this lesson.
30. What risk or mistake should a careful user avoid?
31. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 3 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 4: Evaluating Online Information and Misinformation

Introduction

Digital literacy includes deciding whether online information deserves trust. False, outdated, manipulated or incomplete information can spread quickly.

Learning Objectives

- Explain the main concepts in evaluating online information and misinformation.
- Complete a guided practical related to evaluating online information and misinformation.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Check who created the content and whether the author or organisation is identifiable.

Key point: Check publication or update dates when freshness matters.

Key point: Separate evidence from opinion, advertising and unsupported claims.

Key point: Images and headlines can be misleading when removed from context.

Key point: Cross-check important claims with reliable independent sources before sharing.

Source Evaluation Checklist

Five questions before relying on online information

Who? Who published it?	When? Is it current enough?
Why? Inform, sell, persuade or entertain?	Evidence? Are claims supported?
Cross-check? Do trustworthy sources agree?	

Figure 4: Instructional visual for Evaluating Online Information and Misinformation.

Step-by-Step Guided Practical

1. Find two harmless articles about the same technology topic.
2. Record publisher, date, purpose and evidence used.
3. Identify any differences in claims.
4. Choose which source you would rely on and justify your choice.
5. Write a two-sentence rule for avoiding misinformation.

Ethan Digital Academy Case Study

Before Ethan Digital Academy publishes a technology update, staff should verify it from current, credible sources rather than forwarding an unverified social-media post.

Review Questions

32. What is the main purpose of evaluating online information and misinformation?
33. State two good practices from this lesson.
34. What risk or mistake should a careful user avoid?
35. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 4 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 5: Downloading, Uploading and Managing Online Files

Introduction

Internet users often move files between local devices and online services. Understanding upload, download and storage location prevents confusion and accidental data exposure.

Learning Objectives

- Explain the main concepts in downloading, uploading and managing online files.
- Complete a guided practical related to downloading, uploading and managing online files.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Downloading saves a copy from an online service to a device.

Key point: Uploading sends or copies a local file to an authorised online service.

Key point: A cloud file may remain online until downloaded or synchronised.

Key point: Use clear file names and known folders so downloaded work can be found later.

Key point: Only upload files you are authorised to share.

Figure 5: Instructional visual for Downloading, Uploading and Managing Online Files.

Step-by-Step Guided Practical

1. Create a harmless text document called Internet Practice.
2. Upload it to an authorised practice cloud folder.
3. Confirm the online copy is present.
4. Download a copy to a known Downloads or practice folder.
5. Rename the downloaded copy clearly and identify which copy is local and which is online.

Ethan Digital Academy Case Study

Learners may download approved course materials and upload assignments while keeping their local folders organised.

Review Questions

36. What is the main purpose of downloading, uploading and managing online files?
37. State two good practices from this lesson.
38. What risk or mistake should a careful user avoid?
39. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 5 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 6: Email Foundations and Email Addresses

Introduction

Email is a system for sending digital messages between addresses. A professional email address and correct recipient entry are essential for reliable communication.

Learning Objectives

- Explain the main concepts in email foundations and email addresses.
- Complete a guided practical related to email foundations and email addresses.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: An email address normally contains a local name, @ symbol and domain.

Key point: The To field contains primary recipients.

Key point: CC sends a visible copy to secondary recipients; BCC can protect recipient visibility in appropriate bulk communication.

Key point: The subject line should state the purpose clearly.

Key point: Email should not be used to request or share passwords or one-time security codes.

Anatomy of a Professional Email

Every field has a purpose

To

Primary recipient

CC / BCC

Secondary or privacy-aware distribution

Subject

Clear summary of purpose

Body

Greeting, message, action and closing

Attachment

Checked before sending

Signature

Identifies the sender appropriately

Figure 6: Instructional visual for Email Foundations and Email Addresses.

Step-by-Step Guided Practical

1. Open your email service and start a new draft.
2. Identify To, CC/BCC, Subject and message body.
3. Enter a fictional practice recipient such as learner@example.com but do not send.
4. Write the subject 'Digital Skills Class Question'.
5. Delete the practice recipient before closing the draft.

Ethan Digital Academy Case Study

Academy staff can use clear subject lines such as 'Excel Class - Schedule Update' so learners understand the purpose immediately.

Review Questions

40. What is the main purpose of email foundations and email addresses?
41. State two good practices from this lesson.
42. What risk or mistake should a careful user avoid?
43. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 6 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 7: Writing Professional Emails

Introduction

Professional email writing is concise, respectful and action-oriented. The reader should quickly understand why the message was sent and what happens next.

Learning Objectives

- Explain the main concepts in writing professional emails.
- Complete a guided practical related to writing professional emails.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Begin with an appropriate greeting.

Key point: State the purpose early in the message.

Key point: Use short paragraphs and specific dates or actions where needed.

Key point: Close politely and include an appropriate name or signature.

Key point: Read the message once from the recipient's perspective before sending.

Step-by-Step Guided Practical

1. Draft an email to a fictional instructor asking for clarification about an assignment.
2. Use a clear subject line.
3. Write a greeting, purpose, one specific question and a polite closing.
4. Check spelling and tone.
5. Do not send; save or delete the draft as instructed.

Ethan Digital Academy Case Study

A learner who cannot attend a class should communicate the relevant information politely rather than sending an unclear one-word message.

Review Questions

44. What is the main purpose of writing professional emails?
45. State two good practices from this lesson.
46. What risk or mistake should a careful user avoid?
47. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 7 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 8: Attachments, Links and Safe File Sharing

Introduction

Attachments and links make email useful, but they also require careful checking. Users should confirm both what they send and what they open.

Learning Objectives

- Explain the main concepts in attachments, links and safe file sharing.
- Complete a guided practical related to attachments, links and safe file sharing.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Before sending, confirm the correct file is attached and does not contain unrelated private information.

Key point: Before opening an unexpected attachment, verify the sender and context.

Key point: Do not open suspicious files simply because the message looks urgent.

Key point: For large or collaborative files, an authorised cloud link may be more suitable than repeated attachments.

Key point: Check link text and destination carefully before entering account credentials.

Safe Attachment Workflow

Check before opening or sending

Expected?

Were you expecting the file?

Sender?

Can you verify who sent it?

File type?

Does the attachment make sense?

Send carefully

Confirm recipient and correct file before sending

Figure 8: Instructional visual for Attachments, Links and Safe File Sharing.

Step-by-Step Guided Practical

1. Create a harmless practice PDF or text file.
2. Attach it to a draft email.
3. Confirm the filename and file type.
4. Remove it, then attach the correct file again.
5. Write three checks you would make before opening an unexpected attachment.

Ethan Digital Academy Case Study

An instructor sending course notes should attach the approved learner copy, not an internal administrative document with unrelated information.

Review Questions

48. What is the main purpose of attachments, links and safe file sharing?
49. State two good practices from this lesson.
50. What risk or mistake should a careful user avoid?
51. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 8 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 9: Inbox Organisation, Search and Email Management

Introduction

A busy inbox becomes easier to manage when messages are searched, labelled or filed consistently. Organisation also reduces the chance of overlooking important communication.

Learning Objectives

- Explain the main concepts in inbox organisation, search and email management.
- Complete a guided practical related to inbox organisation, search and email management.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Search can find messages by sender, subject or keywords.

Key point: Labels or folders can group messages by course, project or purpose.

Key point: Stars or flags can mark messages that require attention.

Key point: Archive removes a message from the main inbox without necessarily deleting it.

Key point: Delete unwanted messages according to appropriate retention rules.

Step-by-Step Guided Practical

1. Create or identify a practice label/folder called Training.
2. Move or label a harmless practice message.
3. Search for the message by subject.
4. Mark it for follow-up, then clear the marker.
5. Explain the difference between archive and delete in your email service.

Ethan Digital Academy Case Study

Academy staff can organise messages by programme or cohort so course enquiries are easier to retrieve.

Review Questions

52. What is the main purpose of inbox organisation, search and email management?
53. State two good practices from this lesson.
54. What risk or mistake should a careful user avoid?
55. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 9 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 10: Phishing, Scams and Suspicious Messages

Introduction

Phishing is an attempt to trick people into revealing sensitive information or taking an unsafe action. Awareness is more important than trying to investigate suspicious systems yourself.

Learning Objectives

- Explain the main concepts in phishing, scams and suspicious messages.
- Complete a guided practical related to phishing, scams and suspicious messages.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Warning signs can include unusual urgency, unexpected payment requests, sender mismatches, unfamiliar links and requests for passwords or security codes.

Key point: A familiar logo or display name does not prove a message is genuine.

Key point: When uncertain, contact the organisation through a known official channel rather than replying to the suspicious message.

Key point: Do not forward suspicious links to friends for them to test.

Key point: Use the email provider's report-phishing or spam feature where appropriate.

Phishing Warning Signs

Pause and verify unexpected messages

Urgency

Pressure to act immediately

Sender mismatch

Display name and address do not agree

Unexpected link

Destination is unfamiliar

Sensitive request

Asks for password, code or confidential data

Figure 10: Instructional visual for Phishing, Scams and Suspicious Messages.

Step-by-Step Guided Practical

1. Review a fictional suspicious-message example supplied by the instructor.
2. Circle or list four warning signs.
3. Explain how you would verify the request using an official channel.
4. State what information you should never send by email.
5. Practise locating the Report spam/phishing control without reporting a legitimate message.

Ethan Digital Academy Case Study

If a message claims an Academy account will be closed unless a password is sent immediately, the recipient should not comply and should verify through authorised Academy support.

Review Questions

56. What is the main purpose of phishing, scams and suspicious messages?
57. State two good practices from this lesson.
58. What risk or mistake should a careful user avoid?
59. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 10 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 11: Passwords, MFA and Account Recovery

Introduction

Email accounts often unlock many other online services, so protecting them is essential. Strong authentication reduces the chance that one stolen password leads to wider account loss.

Learning Objectives

- Explain the main concepts in passwords, mfa and account recovery.
- Complete a guided practical related to passwords, mfa and account recovery.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Use a long, unique password or passphrase for important accounts.

Key point: Do not reuse the same password across unrelated services.

Key point: Multi-factor authentication adds another verification step.

Key point: Never share one-time codes with someone who contacts you unexpectedly.

Key point: Keep recovery email or phone information current where appropriate.

Step-by-Step Guided Practical

1. Without revealing your password, write the characteristics of a strong passphrase.
2. Check whether your email provider offers MFA.
3. Review recovery options on your own account if permitted.
4. Write a safe response to someone asking for your one-time code.
5. Explain why password reuse is risky.

Ethan Digital Academy Case Study

Academy staff accounts should use unique credentials and additional authentication where supported because email may contain operational information.

Review Questions

60. What is the main purpose of passwords, mfa and account recovery?
61. State two good practices from this lesson.
62. What risk or mistake should a careful user avoid?

63. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 11 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 12: Privacy, Cookies and Digital Footprints

Introduction

Browsing and communication can create records about user activity. Privacy-aware users understand what they share and review permissions instead of assuming everything online disappears.

Learning Objectives

- Explain the main concepts in privacy, cookies and digital footprints.
- Complete a guided practical related to privacy, cookies and digital footprints.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: A digital footprint is the trail of information created by online activity.

Key point: Cookies can support sign-in, preferences and analytics; browser settings provide controls for managing them.

Key point: Privacy settings influence who can view content, but screenshots and redistribution can still occur.

Key point: Avoid publishing personal information that is unnecessary for the task.

Key point: Review app and site permissions periodically.

Privacy and Digital Footprint

Online actions can leave lasting records

Share less

Post only what is necessary

Permissions

Review who can see content

Accounts

Use secure sign-in habits

Think ahead

Consider future impact before posting

Figure 12: Instructional visual for Privacy, Cookies and Digital Footprints.

Step-by-Step Guided Practical

1. Open your browser privacy/settings area.
2. Locate cookie or site-data controls without deleting anything required for your accounts.
3. Review permissions for one harmless website.
4. Write three examples of information you would avoid posting publicly.
5. Describe one positive digital-footprint habit.

Ethan Digital Academy Case Study

Learners submitting assignments should share only the information requested for the academic task.

Review Questions

64. What is the main purpose of privacy, cookies and digital footprints?
65. State two good practices from this lesson.
66. What risk or mistake should a careful user avoid?
67. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 12 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 13: Wi-Fi, Public Computers and Safer Connections

Introduction

Internet access may come from home, school, mobile data or public networks. Users should adjust their behaviour when they do not control the network or computer.

Learning Objectives

- Explain the main concepts in wi-fi, public computers and safer connections.
- Complete a guided practical related to wi-fi, public computers and safer connections.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Prefer trusted networks for sensitive account activity.

Key point: Public Wi-Fi may expose users to additional risks; avoid unnecessary sensitive transactions when trust is unclear.

Key point: On shared computers, do not save passwords and always sign out.

Key point: Keep browsers and operating systems updated.

Key point: A screen lock helps protect a device when left unattended.

Safer Network Habits

Protect information when connecting

Trusted network

Prefer networks you know and are authorised to use

Public Wi-Fi

Avoid sensitive activity when risk is unclear

Updates

Keep devices and browsers updated

Sign out

Especially on shared or public computers

Figure 13: Instructional visual for Wi-Fi, Public Computers and Safer Connections.

Step-by-Step Guided Practical

1. Identify whether your current connection is home, school, mobile or public.
2. List two activities you would postpone on an unfamiliar public network.
3. Practise signing out of a non-sensitive practice account on your own device.
4. Check for browser updates using normal settings.
5. Create a four-point shared-computer checklist.

Ethan Digital Academy Case Study

A learner using a library computer should sign out completely and avoid leaving downloaded personal files behind.

Review Questions

68. What is the main purpose of wi-fi, public computers and safer connections?
69. State two good practices from this lesson.
70. What risk or mistake should a careful user avoid?
71. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 13 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 14: Video Calls, Messaging and Online Etiquette

Introduction

Internet communication includes video meetings and instant messaging. Professional behaviour applies even when communication is fast and informal.

Learning Objectives

- Explain the main concepts in video calls, messaging and online etiquette.
- Complete a guided practical related to video calls, messaging and online etiquette.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Use clear display names in academic or workplace meetings.

Key point: Mute background noise when not speaking.

Key point: Avoid sharing screenshots, recordings or private chat content without permission.

Key point: Keep group messages relevant to the group's purpose.

Key point: Disagreement should remain respectful and focused on the issue.

Step-by-Step Guided Practical

1. Write five rules for a professional online class.
2. Prepare a short agenda for a 15-minute study meeting.
3. Practise checking microphone and camera controls on an authorised platform.
4. Write a respectful message asking a group to return to the topic.
5. Explain why recording permission matters.

Ethan Digital Academy Case Study

Online Ethan Digital Academy classes should follow the same respect and attention standards as physical classroom sessions.

Review Questions

72. What is the main purpose of video calls, messaging and online etiquette?
73. State two good practices from this lesson.
74. What risk or mistake should a careful user avoid?

75. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 14 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 15: Online Forms, Registrations and Transactions

Introduction

Many websites use forms for registration, enquiries and transactions. Users should confirm the site and understand what information is required before submitting.

Learning Objectives

- Explain the main concepts in online forms, registrations and transactions.
- Complete a guided practical related to online forms, registrations and transactions.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Check that you are on the intended official website before entering information.

Key point: Required fields should be relevant to the service.

Key point: Read important terms, prices and confirmation details before submitting.

Key point: Do not enter payment information into suspicious or unexpected forms.

Key point: Keep legitimate confirmation messages or receipts when appropriate.

Step-by-Step Guided Practical

1. Open a harmless practice form created by your instructor.
2. Identify required and optional fields.
3. Check the domain or platform hosting the form.
4. Complete it using fictional information.
5. Review all entries before submitting.

Ethan Digital Academy Case Study

A course registration form should request only information necessary to enrol and support the learner.

Review Questions

76. What is the main purpose of online forms, registrations and transactions?
77. State two good practices from this lesson.
78. What risk or mistake should a careful user avoid?
79. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 15 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 16: Email Productivity and Calendar Follow-Up

Introduction

Email is more effective when messages lead to organised actions. Flags, tasks and calendar events can help users remember deadlines and commitments.

Learning Objectives

- Explain the main concepts in email productivity and calendar follow-up.
- Complete a guided practical related to email productivity and calendar follow-up.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Convert important requests into clear next actions.

Key point: Use reminders or calendar events for deadlines instead of relying only on memory.

Key point: Avoid marking every message as urgent.

Key point: Keep action-related messages until the task is complete according to your organisation's rules.

Key point: Review pending actions regularly.

Figure 16: Instructional visual for Email Productivity and Calendar Follow-Up.

Step-by-Step Guided Practical

1. Draft a fictional email about an assignment deadline.
2. Create a practice calendar reminder for the deadline.
3. Add a simple task such as 'Review assignment instructions'.
4. Mark the task complete after the exercise.
5. Explain how this workflow prevents missed deadlines.

Ethan Digital Academy Case Study

An instructor can turn a learner-support request into a scheduled follow-up instead of leaving the message buried in the inbox.

Review Questions

80. What is the main purpose of email productivity and calendar follow-up?
81. State two good practices from this lesson.
82. What risk or mistake should a careful user avoid?
83. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 16 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 17: Responsible Internet Use, Copyright and Online Conduct

Introduction

Responsible internet use includes respecting other people, intellectual property, school rules and applicable laws. Being able to access content does not mean it is free to copy or redistribute.

Learning Objectives

- Explain the main concepts in responsible internet use, copyright and online conduct.
- Complete a guided practical related to responsible internet use, copyright and online conduct.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Credit sources when using ideas, data or permitted quotations.

Key point: Do not copy entire protected works into assignments without permission.

Key point: Use appropriately licensed or original images for public projects.

Key point: Respect platform rules and other people's privacy.

Key point: Report harmful or inappropriate online behaviour to a trusted adult, teacher or authorised administrator when necessary.

Step-by-Step Guided Practical

1. Choose a harmless research topic.
2. Record the title and publisher of two sources.
3. Paraphrase one idea in your own words and note the source.
4. Identify one image source that clearly states its usage licence.
5. Write three rules for respectful online conduct.

Ethan Digital Academy Case Study

Academy learners should create original work and acknowledge sources rather than presenting copied online material as their own.

Review Questions

84. What is the main purpose of responsible internet use, copyright and online conduct?
85. State two good practices from this lesson.

86. What risk or mistake should a careful user avoid?
87. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 17 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 18: Integrated Internet and Email Workflow

Introduction

Digital competence means combining research, file handling, communication and follow-up into one reliable workflow.

Learning Objectives

- Explain the main concepts in integrated internet and email workflow.
- Complete a guided practical related to integrated internet and email workflow.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: Start with a clear task and identify what information is needed.

Key point: Search and evaluate sources before using them.

Key point: Save or create files with meaningful names.

Key point: Communicate findings through a professional email or authorised platform.

Key point: Schedule follow-up actions and protect private information throughout the process.

Figure 18: Instructional visual for Integrated Internet and Email Workflow.

Step-by-Step Guided Practical

1. Research a harmless digital-skills topic using two credible sources.
2. Create a one-page summary in your own words.
3. Save it with a clear filename.
4. Attach it to a draft professional email addressed to a fictional recipient.
5. Create a calendar reminder for a fictional follow-up date.

Ethan Digital Academy Case Study

An Academy learner can research a software topic, prepare a short report, email it to an instructor and schedule the submission deadline.

Review Questions

88. What is the main purpose of integrated internet and email workflow?
89. State two good practices from this lesson.
90. What risk or mistake should a careful user avoid?
91. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 18 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Lesson 19: Final Internet & Email Skills Project

Introduction

The final project demonstrates safe, professional and effective use of the internet and email in a realistic academic scenario.

Learning Objectives

- Explain the main concepts in final internet & email skills project.
- Complete a guided practical related to final internet & email skills project.
- Apply safe, responsible and professional digital practices.

Teaching Content

Key point: The project should show research skill, source evaluation, file organisation, email writing, attachment handling, privacy awareness and follow-up planning.

Key point: Use fictional identities and non-sensitive information throughout the exercise.

Key point: Quality is measured by accuracy, clarity, safety and professionalism.

Key point: Do not contact strangers or test suspicious links as part of the project.

Key point: Review every item before submission.

Step-by-Step Guided Practical

1. Choose a fictional Ethan Digital Academy short course.
2. Research three reliable sources relevant to the course.
3. Prepare a one-page source evaluation and summary.
4. Draft a professional email with the summary attached.
5. Create a follow-up calendar item and a short security/privacy checklist.
6. Submit the project according to instructor directions.

Ethan Digital Academy Case Study

This project models the complete information-to-communication workflow a learner may use in school or work.

Review Questions

92. What is the main purpose of final internet & email skills project?
93. State two good practices from this lesson.
94. What risk or mistake should a careful user avoid?

95. Give one academic or workplace example of this skill.

Assignment

Repeat the Lesson 19 practical using only authorised accounts and harmless information. Save any practice file clearly and write 100-150 words explaining what you learned.

Final Practical Project - 100 Marks

Complete an Internet & Email Skills project for a fictional Ethan Digital Academy course. Do not contact strangers or use real sensitive information.

Component	Marks	Requirement
Web research	20	Use three credible sources and explain why they are suitable.
Source evaluation	15	Assess publisher, date, purpose and evidence.
File organisation	10	Use clear file and folder names.
Professional email	20	Draft a clear message with appropriate subject, greeting, body and closing.
Attachment handling	10	Attach the correct harmless practice document and explain checks performed.
Security and privacy	15	Identify account, phishing, privacy and connection precautions.
Follow-up plan	5	Create a suitable reminder/calendar action.
Reflection	5	Explain what was learned.

Course Quiz - 30 Questions

1. What is the internet?
2. How is the web different from the internet?
3. What is a web browser?
4. What is a domain name?
5. What does HTTPS indicate?
6. What makes a search query more effective?
7. Why should important online claims be cross-checked?
8. Name two questions used to evaluate a source.
9. What is downloading?
10. What is uploading?
11. What is the purpose of the email To field?
12. What is CC used for?
13. Why might BCC be used appropriately?
14. What makes a good subject line?
15. Name three parts of a professional email body.
16. What should you check before sending an attachment?
17. State two warning signs of phishing.
18. What should you do if an unexpected message asks for your password?
19. Why should important accounts use unique passwords?
20. What does MFA add to account security?
21. What is a digital footprint?
22. Why should users review privacy settings?
23. State one safer habit for public Wi-Fi.
24. What should you do after using a shared computer?
25. Why should online meetings be recorded only with permission?
26. What should you check before submitting an online form?
27. How can labels or folders help email management?

28. Why are calendar reminders useful?
29. Why should online sources be credited?
30. Describe the stages of a professional internet-to-email workflow.

Final Examination - 100 Marks

Section A - Internet and Browsing (20 marks)

Explain the internet, web browsers, URLs, domains, HTTPS and safe browsing habits.

Section B - Research and Information Evaluation (20 marks)

Describe a professional method for searching, evaluating, comparing and recording online sources.

Section C - Professional Email (20 marks)

Write and explain the structure of a professional email, including recipient fields, subject, body, attachments and follow-up.

Section D - Security and Privacy (20 marks)

Explain phishing awareness, strong authentication, privacy, digital footprints, safer network habits and shared-computer precautions.

Section E - Integrated Scenario (20 marks)

Design a complete workflow for researching a digital topic, creating a short report, emailing it to an instructor and scheduling follow-up.

Course Completion Outcome

On successful completion, the learner should be able to browse and search the web confidently, evaluate online information, manage downloads and uploads, communicate professionally by email, organise messages, handle attachments responsibly, recognise common phishing warning signs, protect account privacy and combine internet research with a reliable communication workflow.

Professional Practice Checklist

- Verify websites and recipients before sharing information.
- Use strong, unique authentication for important accounts.
- Do not share passwords or one-time codes.
- Pause and verify unexpected links, attachments and urgent requests.
- Use professional language in academic and workplace communication.
- Respect privacy, copyright and online conduct rules.
