

ETHAN DIGITAL ACADEMY

MICROSOFT POWERPOINT

Complete Paid Digital Course

Course Code: EDA-PPT-104

Level: Beginner to Intermediate

Duration: 4 Weeks (12 Lessons)

Certificate: Professional Certificate in Microsoft PowerPoint

Prerequisites: Basic Computer Appreciation

Learning Format: Classroom + Practical

Paid Enrollee Course Material

COURSE OVERVIEW

Microsoft PowerPoint is a professional presentation application for communicating ideas visually. This course takes learners from basic slide creation to structured presentation design, visual content, charts, branding, transitions, animations, multimedia and confident presentation delivery.

The emphasis is on producing clear, attractive and purposeful presentations for education, business, training and professional communication.

LEARNING OBJECTIVES

- Understand PowerPoint and its professional uses.
- Identify the PowerPoint interface and presentation views.
- Create and organize slides effectively.
- Apply professional themes and layouts.
- Format slide text for readability.
- Insert and arrange pictures, icons, shapes and SmartArt.
- Present information with tables and charts.
- Use Slide Master concepts for consistent branding.
- Apply transitions appropriately.
- Use animations without distracting the audience.
- Add and manage multimedia.
- Deliver, export and share professional presentations.

COURSE OUTLINE

Module	Topic
1	Introduction to Microsoft PowerPoint
2	Creating and Managing Slides
3	Themes, Templates and Slide Design
4	Working with Text
5	Pictures, Icons, Shapes and SmartArt
6	Tables, Charts and Data Presentation
7	Slide Master and Consistent Branding
8	Transitions
9	Animations
10	Audio, Video and Multimedia
11	Presentation Delivery and Presenter Tools
12	Exporting, Sharing and Final Project

MODULE 1: INTRODUCTION TO MICROSOFT POWERPOINT

Microsoft PowerPoint is presentation software used to communicate information through slides containing text, pictures, charts, diagrams, audio and video.

It is widely used in classrooms, business meetings, training, seminars, proposals, reports, sales presentations and public speaking.

Students identify the Ribbon, slide pane, thumbnail pane, Notes area, status bar, views and presentation workspace.

PRACTICAL

Open PowerPoint, create a blank presentation, add a title slide and save the file.

Review Questions

1. Explain the main concept covered in Introduction to Microsoft PowerPoint.
2. Give two professional uses connected with Introduction to Microsoft PowerPoint.
3. Demonstrate one practical skill from this module.

MODULE 2: CREATING AND MANAGING SLIDES

Students learn to create new presentations, add and duplicate slides, delete slides, reorder slides and choose suitable slide layouts.

A well-structured presentation normally has an opening, logically arranged content and a clear conclusion.

PRACTICAL

Create a five-slide presentation titled My Digital Journey with a title, introduction, skills, goals and conclusion.

Review Questions

1. Explain the main concept covered in Creating and Managing Slides.
2. Give two professional uses connected with Creating and Managing Slides.
3. Demonstrate one practical skill from this module.

MODULE 3: THEMES, TEMPLATES AND SLIDE DESIGN

Themes provide coordinated fonts, backgrounds and visual styles. Templates provide reusable presentation structures.

Good presentation design uses consistency, readable fonts, appropriate contrast, sufficient empty space and limited text.

PRACTICAL

Apply a professional theme and create a consistent design across all slides.

Review Questions

1. Explain the main concept covered in Themes, Templates and Slide Design.
2. Give two professional uses connected with Themes, Templates and Slide Design.
3. Demonstrate one practical skill from this module.

MODULE 4: WORKING WITH TEXT

Students learn to insert and format titles, subtitles, paragraphs, bullet lists and text boxes.

Text should be concise and readable. Slides should support the speaker rather than become pages of crowded notes.

PRACTICAL

Convert a long paragraph into a clear slide using a heading and concise bullet points.

Review Questions

1. Explain the main concept covered in Working with Text.
2. Give two professional uses connected with Working with Text.
3. Demonstrate one practical skill from this module.

MODULE 5: PICTURES, ICONS, SHAPES AND SMARTART

Visual elements can explain ideas faster than text when selected carefully. Students insert, resize, crop, align and arrange pictures, icons and shapes.

SmartArt can present processes, hierarchies, cycles, relationships and lists.

PRACTICAL

Create a process slide showing the stages of digital learning using SmartArt or shapes.

Review Questions

1. Explain the main concept covered in Pictures, Icons, Shapes and SmartArt.
2. Give two professional uses connected with Pictures, Icons, Shapes and SmartArt.
3. Demonstrate one practical skill from this module.

MODULE 6: TABLES, CHARTS AND DATA PRESENTATION

Tables organize structured information, while charts communicate comparisons, trends and proportions.

Students learn to insert tables and common chart types and to simplify data for presentation.

PRACTICAL

Create a chart showing monthly student enrolment and add a small comparison table.

Review Questions

1. Explain the main concept covered in Tables, Charts and Data Presentation.
2. Give two professional uses connected with Tables, Charts and Data Presentation.
3. Demonstrate one practical skill from this module.

MODULE 7: SLIDE MASTER AND CONSISTENT BRANDING

Slide Master controls repeated design elements across a presentation, including fonts, placeholders, logos and layouts.

Using consistent branding improves professionalism and saves time when editing many slides.

PRACTICAL

Create a branded presentation style for Ethan Digital Academy with consistent title placement and footer information.

Review Questions

1. Explain the main concept covered in Slide Master and Consistent Branding.
2. Give two professional uses connected with Slide Master and Consistent Branding.
3. Demonstrate one practical skill from this module.

MODULE 8: TRANSITIONS

Transitions control how one slide changes to the next. Examples include Fade, Push, Wipe and Morph where supported.

Transitions should be used consistently and should not distract from the message.

PRACTICAL

Apply a subtle transition to all slides and adjust its duration.

Review Questions

1. Explain the main concept covered in Transitions.
2. Give two professional uses connected with Transitions.
3. Demonstrate one practical skill from this module.

MODULE 9: ANIMATIONS

Animations control how objects appear, move, emphasize or disappear on a slide.

Students learn entrance, emphasis, exit and motion-path concepts, plus ordering and timing animations.

PRACTICAL

Animate a three-point list so the points appear in a logical sequence during the presentation.

Review Questions

1. Explain the main concept covered in Animations.
2. Give two professional uses connected with Animations.
3. Demonstrate one practical skill from this module.

MODULE 10: AUDIO, VIDEO AND MULTIMEDIA

PowerPoint can include audio and video to enrich training and communication. Students learn insertion, playback options, trimming concepts and media placement.

Multimedia should be relevant, tested before presenting and kept at an appropriate volume and duration.

PRACTICAL

Add a short video or audio clip to a presentation and configure suitable playback behavior.

Review Questions

1. Explain the main concept covered in Audio, Video and Multimedia.
2. Give two professional uses connected with Audio, Video and Multimedia.
3. Demonstrate one practical skill from this module.

MODULE 11: PRESENTATION DELIVERY AND PRESENTER TOOLS

Students learn Slide Show view, Presenter View, speaker notes, rehearse timing, navigation, pointer tools and audience engagement.

Effective delivery requires preparation, clear speech, eye contact, suitable pacing and familiarity with the slides.

PRACTICAL

Deliver a three-minute presentation using speaker notes without reading every word from the screen.

Review Questions

1. Explain the main concept covered in Presentation Delivery and Presenter Tools.
2. Give two professional uses connected with Presentation Delivery and Presenter Tools.
3. Demonstrate one practical skill from this module.

MODULE 12: EXPORTING, SHARING AND FINAL PROJECT

Students learn to review slides, check spelling, prepare handouts, print slides and export presentations to PDF.

PRACTICAL

Create and deliver a professional 8-10 slide Ethan Digital Academy presentation containing text, images, SmartArt or shapes, a chart, transitions and selected animations.

The final work should demonstrate clear structure, consistent branding, readable design and confident delivery.

Review Questions

1. Explain the main concept covered in Exporting, Sharing and Final Project.
2. Give two professional uses connected with Exporting, Sharing and Final Project.
3. Demonstrate one practical skill from this module.

REAL-LIFE CASE STUDY

Ethan Digital Academy is preparing a presentation for prospective students. The presenter creates a clear opening slide, explains available digital training, uses relevant images and a chart, applies consistent academy branding, adds subtle transitions, and closes with a strong call to action. During delivery, Presenter View and speaker notes help the presenter communicate confidently without overcrowding the slides.

FINAL PRACTICAL PROJECT

- Create an 8-10 slide professional presentation.
- Include a title slide, introduction, main content and conclusion.
- Use a consistent theme and readable typography.
- Insert relevant pictures, icons, shapes or SmartArt.
- Include at least one table or chart.
- Apply appropriate transitions.
- Use selected animations purposefully.
- Add speaker notes to important slides.
- Review the presentation in Slide Show mode.
- Export a PDF copy and deliver the presentation to an audience.

QUIZ (20 QUESTIONS)

1. What is Microsoft PowerPoint?
2. Mention four uses of PowerPoint.
3. What is a slide layout?
4. What is a theme?
5. What is a template?
6. Why should slide text be concise?
7. What is a text box?
8. What is SmartArt?
9. Why are charts useful in presentations?
10. What is Slide Master?
11. What is a transition?
12. What is an animation?
13. Name two animation categories.
14. Why should animations be used carefully?
15. Can PowerPoint contain video?
16. What is Presenter View?
17. What are speaker notes?
18. What is Slide Show view?
19. Why should a presentation be rehearsed?

20. Why might a presentation be exported to PDF?

FINAL EXAM (50 Marks)

Section A - 20 Marks: Multiple-choice questions.

Section B - 20 Marks: Short-answer and presentation-design questions.

Section C - 10 Marks: Create and deliver a professional slide presentation.

COURSE COMPLETION OUTCOME

Graduates of EDA-PPT-104 Microsoft PowerPoint will confidently plan, design, enhance, deliver and share professional presentations for classrooms, businesses, meetings, training programmes and public communication.
